

ADVENTureOne LLC

Enabling Mission Success for Our Clients

A Strategic Partnership

ADVENTureOne LLC is a Service-Disabled Veteran Owned Small Business (SDVOSB) established in 2019 as a joint venture (JV) between Advanced Management Strategies Group, Inc. (AMSG) and Loch Harbour Group, Inc. (LHG). Our JV provides professional services with the right staff, using best practices, and providing superior products, to assist our customers with meeting their critical mission requirements.

ADVENTureOne is a premier services provider and a trusted advisor to our clients. AMSG is an ISO 9001:2015 certified SDVOSB in an SBA certified Mentor Protégé with a CMMI-SVC Level 3 large business.

Overview

- 25+ years of experience providing a full range of program, project, acquisition, and portfolio management
- Lifecycle support integrating policy, strategy, process, and operations
- Mission support training, analysis, design, development, implementation, and evaluation
- Resource management, personal property, asset logistics management, operations and maintenance
- DOS experience

Contract Number:
47QRAD20D1043

Contract Period:
02/13/2020 to
12/19/2024

LHG

The Loch Harbour Group (LHG) is a premier service provider, offering versatile, multifaceted professional services to government and private sector clients. As a value added advisor to our clients, we deliver innovative solutions and provide a personalized approach to managing each project, ensuring mission success for our clients. We are ISO 9001:2015 Certified and Appraised at CMMI-SVC Maturity Level 3. Our customers include the DOS, DoD, DHS, Military Services, and VA. LHG provides DOS with SMEs that perform technical security design reviews and inspections of overseas posts to ensure compliance with DS and FAH/FAM requirements; quality management and performance metrics services to improve Government monitoring and oversight for operational activities; and liaison services and activities to facilitate and maintain communication with stakeholders.

AMSG Core Capabilities

- Business Operations
- Knowledge Management
- Capability Development
- Logistics and Supply Management
- Facilities Management

AMSG

Provides a full range of consulting services for Program Life Cycle & Project Management Support, Customer Service Support, and Acquisition Management. AMSG currently supports the Army, Maine Corps, VA VBA and VHA, Federal Trade Commission (FTC), Department of Treasury, Defense Health Agency (DHA), and Department of Energy (DOE) in Program Management, Strategic Planning, Knowledge Management (KM), Business Process Improvement (BPI), Change Management, Performance Metrics, Strategic Communications, and Best Practices development. AMSG is also a Contract Teaming Agreement (CTA) member on a Blanket Purchase Agreement (BPA) for Program Management Support Services for the Department of State (DoS) Domestic Bureaus and Overseas Missions. This BPA meets the needs of twenty-six DoS Bureaus operating both domestically and overseas, providing Program and Project Management, Risk Mitigation, Strategic Planning, and IV&V.

LHG Core Capabilities

- Program Support
- Mission Support Training
- Resource Management
- Design Support
- Engineering

Creating value and empowerment through simplicity

Agil3 Technology Solutions (A3T) is an award-winning high-end provider of IT/Digital Modernization, Cyber Security, NextGen IT, and Emerging Technology services centered on improving the analysis, collection, collaboration and sharing, and security of data.

A3T provides engineering and analytical solutions to the U.S. Department of Defense (DoD), Intelligence, and Civilian Agencies across the Federal Government. As a proven Government service provider, A3T has a distinguished record of providing a wide array of advanced technical services. We deliver integrated services and solutions that optimize and modernize the IT and the Data architecture/infrastructure environment and support critical decision-making to counter cyber security threats.

A3T Capabilities and Expertise

We Specialize in:

- IT/Digital Modernization, Data Analytics, Emerging Technology, Cloud, Predictive Analytics, NextGen IT, Cybersecurity, Professional Services
- Cloud Architecture, Migration, and Security
- Software Development and Assurance
- Cyber Security (Policy & Operations)
- Cyber Data Protection; Computer Network Defense

Our Department of State Support

Allegient Defense currently works closely with the Department of State’s **Chief Information Security Officer (CISO)** in creating a **Cybersecurity Workforce Strategy**, using brainstorming techniques such as mind mapping and gap filling to better understand the needs of the department from both human resources and skill levels perspectives. We have created an **Overall Cybersecurity Category, Role, and Skillset Matrix**, working with Workforce Subject Matter experts from **Cybersecurity and Infrastructure Security Agency (CISA)** to help ensure best practices are utilized. Our team uses innovative approaches to problem-solving, such as **Lean concepts and principles** to help eliminate wasteful inefficiencies and capitalize on the strengths of the department.

Past Performance: Department of State (DoS), Executive Secretariat's (ExecTech) Office

We provided 24/7/365 support to the S/ES ExecTech Office, providing a Customer Service Center (CSC), secure communications maintenance, Mobile Device Management (MDM) and systems administration. We directly implemented desktop support, system administration, network administrative support, system security support, mobile device management (MDM) and secure video teleconferencing support for ExecTech’s Classified and Unclassified local area and wide area networks (LAN and WAN) and data communications, worldwide customer support. We provided accurate status updates and verified reasons why there may have been delays in task completion to requesters in government leads in a professional manner.

Designed Deliverables for DoS

- Cybersecurity Implementation Plan
- Capital Planning and Investment Control (CPIC) Resource Guide and Checklist, to provide stakeholders with a step-by-step process for ensuring cybersecurity is incorporated into the CPIC process
- Cybersecurity Strategy Vision and Mission Statements
- PMO Charter for the Cybersecurity PMO

ANALYTICAL MECHANICS ASSOCIATES

An Engineering and Technology Company

Since 1962, AMA has worked with government and commercial organizations solving tough engineering, math and business problems. AMA combines the best of engineering and mathematics capabilities with the latest in information technology and visualization to build innovative solutions. The knowledge, innovation and dedication of the AMA team creates solutions for today's problems and provides a catalyst for tomorrow's discoveries. AMA is a One Acquisition Solution for Integrated Services (OASIS) Small Business (SB) Pool 4 prime contractor.

KEY CAPABILITIES

● Engineering

From spacecraft to automobiles, AMA provides cutting edge solutions in design, modeling, analysis, simulation and optimization. AMA's innovative solutions have helped industry and government customers improve product performance and achieve mission success.

● Research & Development (R&D)

AMA delivers R&D solutions that drive innovation across many disciplines and industries. This is demonstrated by our academic publications, contributions to government research labs, and continual commercial patents. AMA provides R&D for our nation's most critical tasks, working with our nation's leading institutions.

● Information Technology & Enterprise Solutions

AMA is involved with large scale IT projects. Experience ranges from highly focused custom software development to design and deployment of nationwide integrated collaborative systems. AMA personnel are trained in leading IT software tools & technologies.

● Analytics

AMA's analytics team makes extensive use of data, statistical and quantitative analysis, and predictive modeling to drive decision making. Specialty areas include big data, data science, data mining, data integration, application and solution development, data visualization, and predictive modeling, among others.

● Multimedia & Visualization

AMA capabilities are broad, including Emmy winning videos, strategic communication, education and public outreach, graphic design and multimedia, 3D modeling and animation, high speed photography, and virtual and augmented reality.

Active HTG provides rapid, nimble and collaborative business services focused on human experience, digital innovation and business transformation. We harness creativity, technology and culture to connect people and systems to impact the world. We're advisors, strategists and engineers focused on people, above all else.

We believe in generating success collaboratively, leaving government organizations stronger after every engagement and building trust for the next big challenge.

Our work inspires people, fuels change and makes an impact.

Active HTG is a Small Business Joint Venture comprised of Active Resources and Enterprise Resource Performance, Inc. (ERPi). As part of both the GSA's and SBA's Mentor-Protégé Programs, Active and ERPi have a strong working relationship through more than 15 engagements over the last five years.

ASIRTek
Federal Services, LLC

TOP SECRET FCL

OVERVIEW

ASIRTek Federal Services, LLC is an 8(a), SDVOSB Joint Venture (JV) between **ITI Solutions** and **FEDITC** that merges the broad and complimentary competences of each company to deliver complex professional, technical, operational, & knowledge-based services to the DoD, DoS, and U.S. intelligence community.

AREAS OF EXPERTISE

Engineering & IT Solutions

- Intelligence, surveillance, & reconnaissance (ISR)
- Product application & analysis of leading sensor systems and technical solutions
- Advisory and assistance services in austere locations such as Afghanistan
- On-site rapid response contingency program management and civil engineering expertise
- Firsthand knowledge of unique complexities of deploying to a Combatant Command Theater of Operation (LOAs, visas, medical clearances, SPOT)
- Architecture & system design
- Software, database development, & web application development
- Cybersecurity

Intelligence Operations

- Counter-drug/counter-terrorism intelligence & information analysis, assessments & reporting in support of investigative activity, protective actions, & response planning services.
- Intelligence analysis
- Cryptologic linguist support
- Translation and interpretation services
- Mission requirements analysis & CONOP Development
- Infrastructure requirement studies
- Processing, evaluation, & dissemination of sensor data

Specialized Intelligence Training

- Foreign language operational intelligence training taught in demanding real-world environments
- Design, curriculum development, & delivery in core & advanced intelligence subject areas such as imagery and COMINT analysis, airborne sensor operator training, cyber, & operations support to multiple U.S.-sponsored Latin American counter-narcotics/counter-terrorism programs

A RECORD OF EXCELLENCE

Over 90% of ATI's CPARS ratings in the past 5 years have been Exceptional or Very Good.

SERVICES FOR THE U.S. DEPARTMENT OF STATE

Projects in 160+ Countries

Worked in 200+ Posts for OBO

Completed over 500 DOS Tasks

ABOUT ATI

Founded in 1980, ATI provides AE design; environmental compliance and remediation; environmental health & safety; construction management; and facility/program management services. Our 110+ employees work with government agencies, public/private institutions, non-profits and industry to solve critical problems affecting the built and natural environment. A small business with a global reach, ATI has worked throughout the US and in 160+ countries to date. We are committed to workplace safety, employee growth, client satisfaction and ethical practices in all aspects of our business. ATI, Inc. holds OASIS 8(a) and OASIS SB contracts associated with the Pool 1 grouping of 21 NAICS codes.

Relevant OASIS Capabilities

- Facility management & operation, asset management;
- Environmental consulting, compliance, and remediation services;
- AE design, planning and programming services;
- Humanitarian mine actions including demining (detection/removal/disposal) technical advisory services, munitions response actions and partner capacity building;
- Program management, training and staffing services;
- Construction & construction management services;
- Industrial hygiene, safety, chemical/biological hazard testing & decontamination;
- Soil, water and air quality testing and risk assessment;
- Water, wastewater and solid waste consulting services;
- Data analysis, visualization and management; and
- Document management and digitization.

GENERAL DEPARTMENT OF STATE EXPERIENCE

Environmental Health & Safety and Industrial Hygiene

ATI provides industrial hygiene and environmental services to the US Department of State (DOS) at 200 embassies and consulates worldwide. To date, ATI has provided these services in more than 160 countries on over 500 tasks since the mid-1990s under multiple contracts. Services provided include hazardous material testing and abatement monitoring; regional facility management staff training and certification; air quality testing; environmental site assessments; and environmental engineering services.

Building Automation Systems Engineering Services

ATI provides Building Automation and HVAC Systems engineering, maintenance and upgrade services to OBO/DOS at embassies and consulates worldwide. Our engineers and technicians, certified in multiple BAS systems by manufacturers such as Siemens, JCI, Niagara, Honeywell etc., support DOS facilities in Africa, Europe, Asia, and South America.

Critical Systems, Global Solutions

ACT-Corp Advantage

- Global presence including key geographical areas; completed projects in over 148 countries and states, executed from our home offices in Virginia and Germany
- ACT-Corp's key business areas are Information Technology (Cyber), Communications Infrastructure, Security Systems and Radio Frequency Systems engineering and installation services that support mission-essential requirements
- Over 21 years' experience implementing upward and downward directed projects in CONUS and OCONUS (including the SWA AOR)
- Geographically and technically diverse small business team with mature, certified, well documented ITIL and ISO-9001:2015 processes

Client Base

U.S. federal government agencies:

- Department of State (**see details on reverse side**)
- Department of Defense
- Department of Homeland Security
 - U.S. Coast Guard

Contract Information

- OASIS SB Pool 3 - GS00Q14OADS307

ACT-Corp Capabilities

• **Engineering Services**

- BICSI certified personnel to include Registered Communication Distribution Designer (RCDDs) and technicians
- System Engineering, Design, Integration, Installation & Testing
- Procurement, engineering, installation & maintenance of critical systems
- Installation Design Plans (IDP), CAD drawings & support, Plans of Action and Milestones, List of Materials, Product Data Sheets, etc.

• **Cyber Security Solutions**

- Identification, Planning and Support for Mission-Critical Networks
- Highly skilled Cyber Security personnel to meet Information Assurance (IA) needs
- Analytical expertise, IA testing capabilities and comprehensive document support for system Certification and Accreditation (C&A)
- Systems testing using current range of automated scanning tools, & associated C&A documentation

• **Radio Frequency Communications**

- Radio Frequency Systems (Tower, Antenna, Radio, Microwave, Wireless LAN, and Satellite Systems)
- Complete antenna systems from MF through SHF including towers, foundations, tower guy pads, guy wires, ground plane/radials, a tower lighting system if required, cabling conduit, Automatic Tuning Unit or Balun as required, signal, power, control, and tower light cabling, all grounding systems including lightning protection systems, and climbing ladder and rail system
- Specialize in HF antenna types including directional and omni-directional antennas, vertical and horizontally polarized antennas, loop arrays and Rotating Log Periodic Antennas (RLPA)

• **Information Technology**

- Configuration and Change Management
- Systems Engineering & System Integration
- Network Management & Help Desk Network & Security Operations Center
- Operations & Maintenance (O&M)
- IT Planning and Budgeting
- Design and Architecture Engineering

Critical Systems,
Global Solutions

Department of State Work

ACT-Corp has been active in supporting Department of State (DoS) work for more than 17 years. During that time, we have been a DoS small business partner in delivering telecommunications infrastructure and integrated Technical Security Systems (TSS) at over 60 embassies and consulates for the Directorate of Overseas Building Operations (OBO), as well as for the Foreign Post Telephone (FPT).

We have provided key DoS engineering and installation services worldwide and have designed and engineered the communications backbone for these facilities.

We serve as a **Prime Contractor** on one (1) DoS IDIQ contract and we have served as a Prime Contractor on two (2) others. We also serve as a DoS **subcontractor** for one (1) Prime Contractor, and we have served as a DoS subcontractor for more than 12 other Prime Contractors.

Embassy Work

ACT-Corp has performed Telecom & Security installations for the DoS in over 60 U.S. Embassies/Consulates around the world. Below are just a few projects, in the following countries:

Algiers, Algeria
Canberra, Australia
Manama, Bahrain
Sarajevo, Bosnia/Herzegovina
Brasilia, Brazil
Rio de Janeiro, Brazil
Ottawa, Canada
Vancouver, Canada
Beijing, China
Hong Kong, China
Bogota, Colombia
Copenhagen, Denmark
Suva, Fiji
Munich, Germany
Port-au-Prince, Haiti
Hyderabad, India
Jerusalem, Israel
Rome, Italy
Kuala Lumpur, Malaysia
Valletta, Malta
Amsterdam, Netherlands
Niamey, Niger
Lahore, Pakistan
Karachi, Pakistan
Islamabad, Pakistan
Peshawar, Pakistan
Belgrade, Serbia
Stockholm, Sweden
Damascus, Syria
Dar es Salaam, Tanzania
Dubai, United Arab Emirates

Department of State (DoS) Competencies

Technical Security Systems

ACT-Corp provides an Integrated Security System (ISS) and supports services that require engineering, design, provisioning, installation, implementation, and testing of fully-functioning ISS, referred to as the Technical Security System (TSS), at new & existing U.S. embassy compounds, consulates, and other DoS facilities around the world. The TSS is an integrated security system "system of systems" that includes:

- Access /entry control systems
- Closed circuit TV systems
- Intrusion detection systems
- Fence protection systems
- Annunciation systems (audible security alarm alerting, public address and mass notification)
- Delay and deterrence systems (barriers, crowd control)
- Screening systems (X-ray, itemizers, walk through metal detectors)
- Security management systems (command and control, distributed)

We perform "turn-key" systems solutions—from initial systems engineering through warranty support—on all equipment and services. During the engineering phase of the project, we typically provide a comprehensive technical solution, to include a detailed bill of materials (BOM), AutoCAD system drawings and detailed product data to include specification sheets, as well as installation and maintenance information. Once our customer approves our engineering/design package, we then procure all equipment and materials. Due to the complex logistic issues associated with these projects (security concerns, international shipping and other aspects), we receive all material in a centralized location where we perform a 100% inventory, validate the BOM, consolidate shipments and then ship the material to the final destination. We obtain approval and country clearance through required agencies and other stakeholders, prior to deploying our installation teams to the site. Once on-site, our senior technician performs an inventory of all equipment and materials to ensure that there was no damage or loss in transit. We then install the systems, and we perform thorough testing and acceptance. Upon acceptance, we prepare test results and "as-built" drawings for submittal and approval by the customer. We perform user training on all systems installed at the facility and transfer warranty certificates to the end user.

Telephone

ACT-Corp is a subcontractor to AT&T under the Vanguard 2.2.5-Janus III Foreign Posts Telephone (FPT) system replacement IDIQ contract, which provides phone system support to all embassies, consulates, and other DoS facilities around the world. In support of the DoS transition from analog phones systems to Voice over Internet Protocol (VOIP) system overseas, ACT-Corp is responsible for the Cable Plant Engineering & Design, prior to the transition to VOIP. ACT-Corp provides support for site surveys, as well as installation teams for implementation for new cabling. In addition, ACT-Corp assists with the equipment installation and the transition from the old analog phone system to the new VOIP phone system. ACT-Corp furnishes, installs, ships, and places into service new telephone systems and telecommunications infrastructure to support the new VOIP systems. These new systems provided by ACT-Corp replace the existing telecommunications systems or serve as new systems at new construction foreign post sites. The replacement of the various telephone systems involves an organized and planned systems approach to engineering, furnishing, and installing the new telephone systems over the life of the program. Supporting services include site surveys, furnishing and delivery of equipment and materials, cabling and wiring (CAT 6 or Fiber Optic Cable to the desktop), equipment preparation, site preparation, installation within the specified location, testing and acceptance procedures, training, remote maintenance, and spare parts provisioning. All hardware provided is new, except analog station sets, which may be new, rebuilt, or remanufactured, but warranted as new. ACT-Corp also supplies key personnel to provide program management, implementation management, quality assurance, logistics management, and technical support. We also provide warranty and non-warranty maintenance support and spare parts provisioning.

I.T. / Cybersecurity

For 10 years from 2004 to 2014, ACT-Corp provided the DoS with critical IT network security and systems modernization services under the Global IT Modernization (GITM) Program for the Department of State (DoS). During that time, as a key enabler of DoS IT services to 46,500 DoS users, our seven-person "strike team" functioned as an equivalent of an AF Cyber Protection Team in deploying to 110 sites in over 100 countries multiple times to assess, engineer, upgrade and replace network and systems infrastructure. That mission included assessing the security, availability and continuity of unclassified and classified networks and upgrading the networks to DoS Bureau of Information Resource Management standards and objectives.

Project Management

We manage all DoS contracts with our virtual Program Management Office (vPMO) web portal. Due to geographic separations, and other logistical challenges, our vPMO is an invaluable resource that allows our technicians, managers and executives instantaneous insight to project status information. We maintain a technical library, project status, issue tracking and other key project information on our portal. We manage this contract under our ISO 9001:2015-certified Quality Management System (QMS), and our data/records repository on our vPMO provides historic information regarding quality of service and overall customer satisfaction/contract performance. We also use our vPMO as a resource management tool, providing our Program Manager (PM) the ability to instantaneously see the impact of schedule slippages or personnel issues and then to shift resources to ensure that our projects remain on track. Since these projects are at an active Embassy construction site, we have to remain flexible to schedule changes driven by the construction of the facility.

CAPABILITIES STATEMENT

for the Department of State

The Department of State can rely on AVIAN to assist in protecting America’s security at home and abroad; promoting American leadership through balanced engagement; and ensuring effectiveness and accountability to the American taxpayer, through delivery of solutions from a resourceful, responsive and reachable organization. We provide engineering and work force development and training; program management; systems engineering; communication strategy; graphic design; acquisition, financial, and logistics management; and test and evaluation of manned and unmanned systems; to a wide range of government and commercial customers. AVIAN is a Service-Disabled Veteran Owned Small Business that is ready to partner with the Department of State to help achieve its goals.

UNMANNED AIRCRAFT SYSTEMS (UAS)

Celebrating 15 years (2005 - 2020)

OUR COMPANY

BB&E is a full-service civil and environmental engineering small business under OASIS SB Pool 1 contract, with the capability and depth and breadth of resources necessary to respond to large and small requirements. We have been providing advisory and assistance support for federal and industrial clients since 2002.

PROGRAM MANAGEMENT

Our qualified, professional, and motivated workforce of program management professionals foster a culture that emphasizes teamwork, integrity, continuous improvement, and effective resource management. Our program management support integrates and manages all activities needed to successfully execute client's requirements that may include coordinating with a wide variety of internal and external agencies and stakeholders for the development of execution strategies, monitoring, and analysis of program performance.

GIS AND DATA MANAGEMENT SUPPORT

BB&E provides support in developing and managing databases to allow for an efficient approach to data capture, integration, and visualization, enabling organizations to have access to geospatial tools that can be used for reporting and analysis of cases and deaths, public health, and response activities at the local and national levels, in addition to managing testing sites and community activities and impact. By effectively integrating and managing data, trends can be analyzed allowing our clients to focus resources and respond to pressing issues.

AUGMENTATION OF CONTRACTING SUPPORT

BB&E offers highly qualified, pre-screened staff that are available to provide immediate support for short- and long-term assignments. Our staffing solutions to augment contracting support are flexible and cost-effective and cover a full spectrum of scope of work and capabilities from junior to senior staff.

LOGISTICS SUPPORT

BB&E offers highly qualified, pre-screened staff that are available to provide immediate support for short- and long-term assignments. Our staffing solutions to augment contracting support are flexible and cost-effective and cover a full spectrum of scope of work and capabilities from junior to senior staff.

CONSTRUCTION MANAGEMENT AND FACILITY SUSTAINMENT, RESTORATION AND MODERNIZATION

Our team of certified architects, engineers, and construction managers provide complete design and construction management support, assisting with studies, investigations, construction management, and facility support (design and construction). BB&E also supports construction projects where expedient issue resolution is needed in order to recover mission-essential infrastructure, including ramping up or expanding infrastructure in response to a natural emergency or pandemic on a quick-turn basis.

CONSTRUCTION MANAGEMENT SUPPORT—PROJECT HIGHLIGHTS

Naval Facilities Engineering Command (NAVFAC) Mid-Atlantic: BB&E is currently completing various capital improvement projects through augmentation of contracting support in the areas of architecture, design (including various engineering disciplines) and construction management. Our team provides assistance in the design, studies, investigations, construction management and facility support (design and construction) for the Facilities Engineering Command (FEC) and its associated Facilities Engineering and Acquisition Divisions. Our support also includes disaster recovery at Camp Lejeune and MCAS Cherry Point due to Hurricane Florence/Hurricane Michael.

Air Force Civil Engineer Center (AFCEC)-Operations: BB&E is providing technical support and facilities planning expertise in support of the Air Force Civil Engineer Center-Operations (AFCEC/CO) in the areas of facilities, pavement, fire protection, and electrical engineering. Our support includes, but it is not limited to, facilities assessments; expert technical analyses regarding civil engineering, construction management, airfield engineering/APE, and fire protection; acquisition/ execution; SMS support; and plans/publications support.

Air Force Utilities Privatization (UP): BB&E provides program management assistance to AFCEC UP, including addressing energy resiliency issues related to disaster recovery.

AFCEC CFSM Support: BB&E provides contingency program support and construction management in remote and forward operating areas, addressing infrastructure recovery due to “in-theater” damage to existing installation. BB&E provides design/construction management (DM/CM) throughout the AOR, providing program management of projects in arduous location such as Jordan, Kuwait, Djibouti, Qatar, and Afghanistan. BB&E team members employed innovative use the S-curve methodology, allowing the team to effectively monitor cost and schedule performance of construction and infrastructure recovery projects.

Infrastructure Recovery at Several Air Force Bases: BB&E provides support to the Air Force on a variety of design and construction projects, including those that need expedient issue resolution to recover mission-essential infrastructure including pavements and airfields. Specific examples include runway failure investigation at Spangdahlem AB; durability problems at Offutt AFB; construction dispute resolution at Andersen AFB; construction assistance at Andrews AFB; sinkholes under aprons and taxiways at MacDill AFB; and runway pavement heaving at Creech AFB.

BB&E’s capabilities are not limited to the examples provided above – our company offers the right people, with the right experience to solve our clients’ toughest challenges, delivering professionally developed, efficient, cost-conscious solutions. We have remained flexible to requirements and adapted our support to deliver high-quality technical resources in support of our customer requirements worldwide on over \$500M in program- and project-level requirements.

Over the past 18 years, BB&E has led the effective and efficient delivery of high-quality civil and environmental engineering services on small business set-aside contracts. In every project, BB&E has demonstrated our commitment to quality, technical expertise, and dedication to put the concerns of our customers first.

CONTRACTING ADVANTAGES

As an 8(a) Native Hawaiian Organization (NHO) Broadleaf offers unique contracting benefits like other Native American owned businesses. These benefits include:

- **\$22M Direct Awards.** Broadleaf may receive direct awards up to \$22M that exceed normal SBA thresholds per [13 CFR 124.506\(b\)\(2\)](#)
- **\$100M Direct Awards.** Effective March 17th 2020, Broadleaf may receive direct awards for the DoD up to \$100M per [the following class deviation](#)
- **Awards cannot be protested.** Awards to Broadleaf cannot be protested per [13 CFR 124.517\(a\)](#)
- **No procurement competition.** There is no requirement to compete procurements to Broadleaf before a sole source award per [13 CFR 124.506\(b\)\(3\)](#)
- **Follow-on to competitive awards can be sole sourced.** As an NHO, Broadleaf may receive sole source awards after a contract was competitively awarded in the 8(a) program
- **Faster procurements via Alpha Contracting.** Broadleaf can work jointly with the Government to reduce procurement time, develop the statement of work, and provide a better solution via "Alpha Contracting"

About Castro & Company

Castro & Company, LLC is a Puerto Rican-owned Small Business CPA firm located in the Washington, DC metropolitan area, specializing in performing work for the Federal Government. We provide audit, advisory, and accounting services that help our clients achieve accountability and transparency. Our extra effort is reflected in every detail of our work and our commitment to our clients.

Castro is a proud member of the RSM US Alliance, a premier affiliation of independent accounting and consulting firms in the United States, with more than 75 member firms. This affiliation gives Castro access to a full range of national and international capabilities from RSM US LLP, a licensed CPA firm and the U.S. member of RSM International, a global network of independent audit and consulting firms with more than 38,000 people in over 120 countries.

How We Can Assist the State Department

Over the past 16 years, Castro has gained extensive experience by helping Federal organizations improve their internal controls and compliance with laws and regulations to better achieve their mission. We are also well-positioned to assist agencies in executing strategies to support and minimize potential risks, and transition to today's more robust Enterprise Risk Management environment.

Castro has been providing accounting and internal control services for the past six years to the U.S. Agency for Global Media (USAGM), which uses the State Dept. as a service provider. Therefore, we have extensive experience working with the State Dept. financial service centers, located in Bangkok, Thailand and Charleston, South Carolina, that provide financial support for USAGM operations overseas. Castro has also performed multiple audits for international organizations including the U.S. Agency for International Development (USAID), the Special Inspector General for Afghanistan Reconstruction (SIGAR), and the Organization of American States (OAS).

Castro Capabilities

Our firm has experience in 14 of the 15 Executive Branch Departments and provides audit, advisory, and accounting services to the Federal Government, inclusive of the following specialized areas:

- ✓ Audit Remediation and Sustainment
- ✓ OMB Circular A-123 Internal Control Compliance
- ✓ Enterprise Risk Management
- ✓ Financial Statement and Performance Audits
- ✓ Financial Management and Accounting
- ✓ IT Audits and Remediation
- ✓ Improper Payments, Fraud Reduction, and DATA Act Support
- ✓ Policy and Procedure Development

Where Our Clients Are Always The Bottom Line.

CAYUSE TECHNOLOGIES

Cayuse Technologies, LLC is a Small Business Administration (SBA) Tribal 8(a) certified technology and government solutions provider located in Pendleton, Oregon. Founded in 2006, our past performance spans both private and public sectors, providing innovative solutions and delivery excellence across a range of information technology and government client missions, focused on minimizing risk through the delivery of quality outcomes.

CORE CAPABILITIES

Information Technology

- Application Development
- Computer Systems Design
- Cybersecurity

OASIS-SB@CAYUSEGOV.COM

CAYUSEGOV.COM

EXPERIENCE - DEPARTMENT OF STATE and RELATED PROJECTS

Comprehensive Information Technology Services

Cayuse provides program and project management and a wide range of information technology services. Application design, development, system integration, and advisory support services support cybersecurity and international investigations, threat analysis, and counterterrorism. We provide Software Development Life Cycle (SLDC) support, hardware distribution systems, telecommunications/ networking systems, IT facility planning, execution of IT infrastructure projects, facilities management, networking, IT engineering services as well as Tier III IT Support across the country.

Global Staffing and Administrative Services

Cayuse recruits and retains an extremely high caliber of personnel in domestic and challenging international locations. We leverage our unique knowledge of Department operations to fulfill numerous staffing task orders involving recruiting assets, deploying employees in compliance with strict regulations, in-country licensing, and managing personnel and industrial security. Our hands-on Program Management approach helps mitigate many potential problems in filling short turnaround staffing requirements, and we have received high praise, including earning recognition of being "the Department's great new staffing contractor."

Operational Support and Watch

Cayuse watch analysts deliver operational support with timely, relevant, and accurate all-hazards information to the client, industry owners and operators, and other security partners to ensure they have a dynamic and comprehensive understanding of the impact of significant incidents and natural disasters. Our personnel provide 24x7x365 situational awareness and crisis monitoring, shared threat information to reduce risk, prevent damage, and enable rapid recovery of industry assets from incidents caused by natural disasters, attacks and other emergencies.

Joint Operations Centers

We understand the challenges of executing an efficient contract start-up, based on client needs, to ensure continuity and a smooth phase-in of mission support. Cayuse mobilized a Joint Operations Center within 25 days with 100% recruiting effort to provide uninterrupted 24x7x365 watch and briefing operations for critical response actions advice to top leadership. Operational support extended to political, economic, civil, and military operations and included support of COVID-19 Department strategic objectives.

Diplomatic Security IT Professional Services

Cayuse supplies a diplomatic security bureau with a safe and secure environment to conduct U.S. foreign policy through IT professional services support. Cayuse provides a broad range of IT support services across four Divisions that includes IT Operations support, help desk services, desktop and remote service support, IT asset and procurement support, network operations, software design and development, systems design and development, IT project management, IT security services related to system and software development and IT operations, special project and event support, application and system monitoring and reporting, IT governance data tracking and reporting and other related functions needed to meet Division IT needs.

Lean Agile Center of Excellence (LACE) Support

Cayuse enhances and enables the Agency's technology workforce through improving skill sets of their software development and support workforce through the implementation of Scaled Agile Framework (SAFe) Agile training and coaching. Cayuse focuses on six primary areas: Training Assessment, Training Development and Delivery, Continuous Improvement, Formal Coaching, Ad Hoc Coaching, Strategic Planning, and Program Management.

CORPORATE OVERVIEW

CSSA was established in 2001. At CSSA, it is our mission to honor God and become our customers' trusted advisor by delivering best-value services that exceed expectations and contribute to their success. Our Systems and Software engineering services support our country's Warfighters and NASA's mission to develop the next generation space flight systems. Our process improvement services enhance customers' operations through innovative approaches for optimizing processes.

HIGHLIGHTS OF CAPABILITIES

Systems and Software Engineering and Development

- Requirements Analysis and Management
- Design and Development
- Modeling and Simulation
- Multi-level Integration and Test
- Database Development
- Configuration and Data Management
- Life Cycle Support

System and Software Assurance

- Independent Verification and Validation
- Quality and Mission Assurance
- Safety Analysis

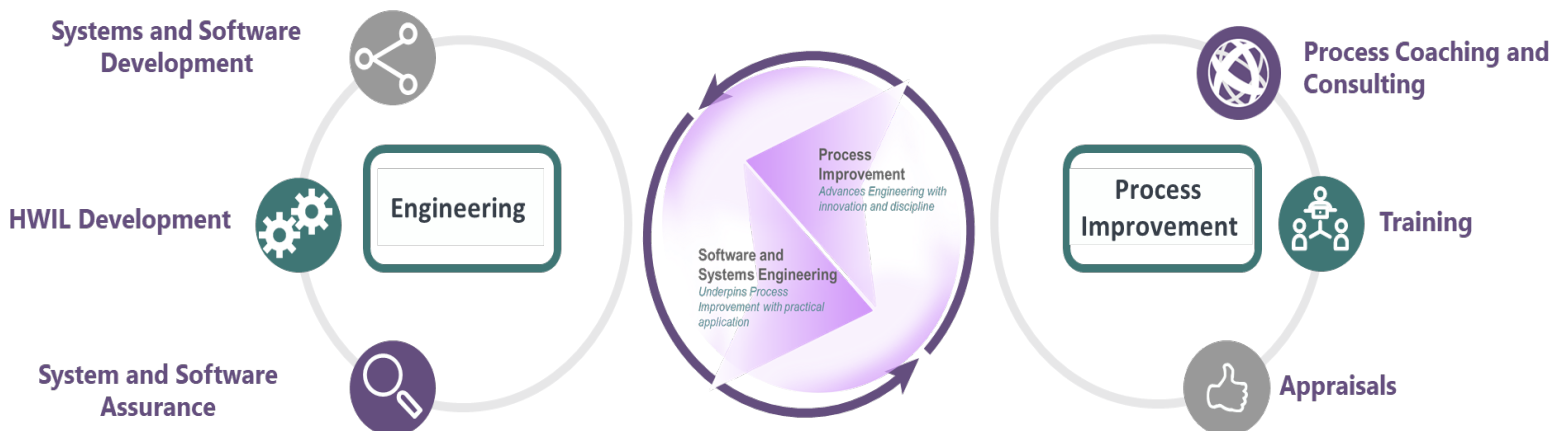

Process Improvement

- Process and CMMI Coaching and Consulting
- Process and CMMI Training
- CMMI Appraisals

Hardware-In-the-Loop Engineering (HWIL) and Development

AWARDS

- NASA Small Business Prime Contractor of the Year
- Marshall Space Flight Center (MSFC) Small Business Prime Contractor Excellence Award
- Better Business Bureau (BBB) Torch Awards for Business Ethics Finalist
- Huntsville/Madison County Chamber of Commerce Government Contracting Professional Services Business of the Year, Best Places to Work Winner, and Woman-Owned Business of the Year

The *INTERFACE* is what sets CSSA apart from our competitors. Our core competencies in Engineering and Process Improvement mutually support each other to provide practical, innovative approaches for mission success. CSSA's process improvement expertise advances engineering solutions with innovation and discipline and our software and systems knowledge underpins our process improvement with PRACTICAL applications for each of our clients.

Provide program design, training, and graphic support. Design, pilot, and promulgate new ways of performing education and cultural diplomacy. Develop and facilitate training on use of virtual exchange platforms. Strategic planning and facilitation. Visual design for publications, exhibits, and presentation materials.

Provide strategic advice. Draft public diplomacy strategies that coordinate Department and USG efforts to understand, engage, inform, and persuade foreign publics to achieve U.S. foreign policy objectives. Work with teams to align existing strategic planning tools to the new Strategic Continuum for Public Diplomacy.

Provide Cyber Program and Policy Advisor. Assist with cyber policy issues related to international security, cybersecurity, combating cybercrime, Internet governance, Internet freedom, the digital economy, and cyber capacity building.

Provide messaging and social media analysis. Produce messaging products for placement on social media online platforms to counter violent extremism, state sponsored propaganda, and misinformation and explain U.S. policies to foreign audiences. Monitor and analyze the online environment.

International Efforts Demand International Experience

Cherokee Federal is a trusted small business partner to the U.S. Department of State. When our country is called to lead diplomatic and stability operations efforts in unstable environments, Cherokee Federal has the experience to handle every detail. With our team's extensive global reach and operational skillset, we understand how to place the right talent in-country safely and securely.

Complex Projects Made Easy

Projects of all sizes become outstanding success stories with Cherokee Federal.

Health and Life Sciences

- Health screenings
- Fitness for duty evaluations
- Epidemiology & public health
- Medical material

Performance Highlights

Diplomatic Security (DS) Mission Support

We provide mission support to the various offices within the DS Countermeasures Directorate. Our program management, administrative, and advisory services enable the Offices to provide physical and technical security capabilities at home and abroad.

Mission Support to U.S. Embassy in Iraq

We provide embassy support operations to the diplomatic mission in Baghdad, Iraq. Our staff are responsible for supporting the mission with program management, property management and logistics support, public affairs, escorting and movement security, and aviation operations support.

Mexico Airport Infrastructure Upgrades

We conducted security assessments to develop and execute the provisioning, installation, and training of equipment and processes to improve the security at all last point of departure airports within Mexico. These upgrades were designed to disrupt threats of terrorism and reduce vulnerabilities to transnational crime organizations operating within the region.

U.S. Embassy United Arab Emirates (UAE)

Our supplemental life support offers military and Department of Homeland Security (DHS) direct hires and eligible family members a comfortable experience while supporting the Chief of Mission (CoM) in Abu Dhabi. Our team offers world-class services that include turnkey solutions for leasing and maintenance, travel and logistics, procurement and property management, mail services and financial services.

“Cherokee Federal is a trusted small business partner to the U.S. Department of State.”

Our Promise

Cherokee Federal offers a smarter way to accomplish your mission by focusing on these core deliverables:

- Knowledgeable, experienced international partner
- Mature tools to monitor situational awareness of our personnel in real-time
- Business licenses in multiple countries
- Cleared companies & personnel
- Competitive, fair & transparent pricing
- Involvement / access to executive & senior management
- Quickly transition contracts & incumbent employees
- Teaming with industry partners (large & small)

Proudly Serving

About Markon Solutions:

Markon Solutions, established in 2007 and headquartered in Falls Church, VA, provides worldwide facilities-related management consulting services to Government and private sector clients. Our professionals support defense, intelligence, and civilian agencies, as well as commercial clients. Markon specializes in facilities support, financial management, acquisition management, security consulting, and training services. Currently, we are working with the Department of Defense, the Intelligence Community, and the Department of State. We are consistently recognized on the Engineering News-Record Top 100 Construction Management-for-Fee and Program Management Firms, Washington Post Top Workplaces, and Best Places to Work in Virginia lists.

About Concourse Federal Group:

Established in 2009, Concourse Federal Group (CFG) is a thriving Department of Veterans Affairs (VA) CVE-verified service-disabled Veteran-owned small business (SDVOSB). Headquartered in Washington, DC, CFG has four offices across the country and has completed over 117 successful projects in support of 14 federal clients in the areas of architecture and engineering, real estate, information technology, and management consulting. We have more than ten years of experience in supporting civilian agencies, that includes more than \$12 billion in federal transactions and federal projects completed in 42 states.

CWS

A Global AEC Partner

Chenega Worldwide Support, LLC

Providing Mission-Critical Architecture, Engineering, & Construction/Facility Support Services OCONUS and Domestically

OVERVIEW

Chenega Worldwide Support (CWS) is a certified 8(a) Small Disadvantaged Business specialized in working in crisis and conflict areas of the world. Founded in 2016 to support US Federal customers worldwide, CWS has quickly grown into a trusted provider of mission-critical Architecture, Engineering, and Construction (AEC) and Advisory & Assistance Services (A&AS) Overseas (OCONUS) and Domestically. CWS holds true to its mission that no matter the location, we will get the job done.

Our team at Chenega Worldwide Support is committed to providing our customers with high-quality AEC and A&AS in an array of diverse environments. We achieve AEC and A&AS staffing needs by providing experts who have decades of technical and regional knowledge. CWS provides a wide range of solutions to all size Federal programs, providing unique and cost-efficient solutions in whatever borders our customers operate within.

CAPABILITIES

Chenega Worldwide Support offers customers support services along our four core business lines:

Integrated Architecture/Engineering Services

Architectural and Engineering Design Services, Fire Protection, Facility Assessments, Integrated Building System Design, Audiovisual/Telecommunications, Electronic Security Systems, Design-Build Management, Cost Estimation, Value Engineering.

Construction Services and Construction Management

Licensed, bonded, and insured turn-key general and specialized construction services ranging in Design-Build, Design-Bid-Build, Secure Facility Construction, Contingency Rapid Construction, and Specialized Equipment Installations both CONUS and OCONUS. Bonding level is \$25M for a single project and \$100M for multiple projects.

Facility Support Services

High-quality and professional cleared operating staff to perform full support services within and around client facilities. Our support includes Maintenance and Operation, General Maintenance, Warehousing and Distribution, Supply Chain Management, Inventory Control, and Asset Management .

Advisory and Assistance Services (A&AS)

Management, Engineering, Subject Matter Experts, Security Engineering, Financial & Administrative Services, Records Management, Systems Integration, Intrusion Detection Design-Build, and Network Solutions.

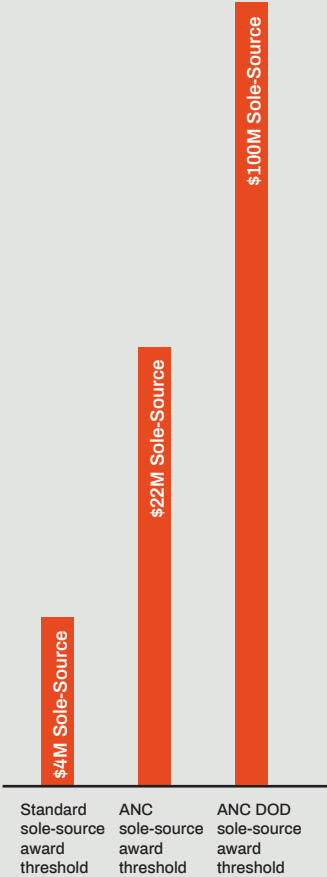

PAST PERFORMANCE EXAMPLES

Chenega Worldwide Support has successfully executed over \$200M in projects nationwide and worldwide, delivering over 20 A/E, A/E/C, A&AS, and O&M in 9 countries across four continents.

- >> USAF FMS: Design-Build Secure Open Storage Accredited Facilities and Flight Simulators Worldwide
- >> DOS OBO - Rapaid Engineering and Construction Design / Build
- >> NAVFAC DC: Engineering Services
- >> US Army , Ft. Belvoir, VA : Design and Rennovate Historical Buildings
- >> USAF - Facility Support Services OCONUS

CONTRACTING ADVANTAGE

The Government may award sole-source contracts to Tribal and ANC 8(a) certified entities for up to \$100M for DoD contracts and up to \$22M for non-DoD contracts without a Justification and Approval (J&A), and with a J&A for sole-source non-DoD contracts over \$22M. The Government benefits by eliminating competitive threshold exemptions per 48 CFR 19.805 1 —Technical, Management, Past Performance, and Pricing Evaluations, enabling a facilitated acquisition process.

8(a) Competitive Advantage

- >> Accelerated Procurement Timeline Starting in as Little as 30 Days
- >> Up to \$100M Sole-Source Award for DOD and \$22M for all other awards without J&A
- >> Cooperative Development of SOW/PWS Between Customer
- >> Pre-award Schedule Risk is no longer an issue due to the non-protestable nature of ANC Sole-Source procurements

CERTIFICATIONS

DEVA is a member firm, in good standing, of the American Institute of Certified Public Accountants (AICPA). In all AICPA Peer Reviews of our quality assurance program conducted to-date (every three years), DEVA has consistently received a clean opinion peer review report with no comments.

ABOUT US:

Deva & Associates, P.C. (DEVA), is a licensed certified public accounting and management consulting firm located in Rockville, Maryland, that is entirely focused on providing Federal financial management and business management services.

Established in 1991, DEVA is a small business that has provided highly professional Federal financial management and reporting, accounting, financial analysis, auditing, internal controls and risk management, oversight and compliance monitoring, process improvements, cost-benefit and business case analyses, and other management consulting services for over 25 years at more than 20 Federal agencies.

CLIENT BASE / AGENCIES SERVED:

(Over 95% of work has been as Prime Contractor)

- Department of Homeland Security
 - Transportation Security Administration
 - Immigration & Customs Enforcement
 - DHS Chief Administrative Officer
- U.S. Air Force
- Nuclear Regulatory Commission
- Department of Commerce
 - Patent and Trademark Office
- Department of Transportation
 - Federal Transit Administration
- Department of Education
 - Office of Federal Student Aid
- Federal Deposit Insurance Corporation
- Securities and Exchange Commission
- Department of Housing and Urban Development
- Federal Housing Finance Agency
- Office of Personnel Management
- Department of Health & Human Services
- Department of the Treasury
 - Alcohol, Tobacco and Firearms
 - Office of Thrift Supervision
- Farm Credit Administration
- Small Business Administration

CORE CAPABILITIES:

Accounting Services

- Accounting policies and procedures
- Internal controls/OMB Circular A-123
- Accounting and financial operations
- Preparation of financial statements
- Reconciliation support and analysis
- Contract/vendor reconciliations
- Recording, summarization, and classification of transactions
- Financial reporting and analysis
- Financial statement audit support, audit readiness, assistance with auditor requests
- Audit remediation, resolution of findings, accounting research, and corrective actions
- Cost accounting/indirect cost allocation

Budgeting Services

- Budget formulation and submission
- Budget execution and control
- Budget monitoring, review, and audit
- Verification/validation of data elements
- Budget trends, estimates and projections
- Budget reporting and reconciliations
- Compliance with Federal budget requirements

Management Consulting Services

- Financial management system/process improvement/conversion initiatives
- Data reconciliation and validation
- Business case analyses
- Financial analyses and assessments
- Performance measures and indicators
- Organizational assessments, due diligence, and Best Practices evaluations
- Economic, benefit-cost, and cost-effectiveness analyses of alternative business approaches/decisions
- Activity-based cost analyses
- Fraud, waste, and abuse deterrence

Financial/Performance Audit Services

- Audits of financial information
- Financial management oversight/review
- Grant/contract monitoring, accountability, and compliance
- Program results/program fraud audits
- Compliance with laws and regulations
- Contractor oversight and surveillance
- Contract closeout audits/reviews

The services provided by DEVA for 12 years at the Transportation Security Administration were regarded by Department of Homeland Security officials as Federal "Best Practices" and a benchmark/model of what the Department needed to accomplish agency-wide across all its other components.

DEVELOPMENT INFRASTRUCTURE, INC (DBA DEVIS) CAPABILITY STATEMENT

Devis holds OASIS Pool 1 SB prime contract number 47QRAD20D1076

CORE COMPETENCIES: PROGRAM MANAGEMENT

Program/Project Management – Use integrated program management processes and integrated baseline reviews and techniques to manage programs up to \$185M

Requirements Management – Collaborate with mission stakeholders to manage requirements of flagship programs using stakeholder-centric methods

CORE COMPETENCIES: MANAGEMENT CONSULTING

Business Process Reengineering – Increase process efficiency through stakeholder engagement, process analysis and intelligent automation (RPA)

Concept Development and Requirements Analysis – System modernization and cloud migration roadmap development

Change Management – Processes we used were adopted by USAID as exemplars of change management and codified in its ADS policy guidance

Knowledge Management – Build KM repositories and tools using user centered design and open source tools including WordPress and Drupal

Training and Facilitation – Learner-centered, performance-based multimedia solutions appeal to generational learners through animated and live action learning solutions

CORE COMPETENCIES: ENGINEERING

Systems Engineering – Design, implement, and manage full lifecycle of complex systems using processes appraised at CMMI Level 3 and under ISO 9001 quality management

Configuration Management – Manage system configuration assets using our tools or our customers in compliance with department or agency CCBs, requirements and lifecycles

System Design and Integration – Build to roadmap, integrate data with multiple agencies, develop system design documents that comply with IRM (or CIO) requirements

Software Development – Expertise with a broad range of tools and technologies to support new, O&M, Agile DevSecOps, and COTS software development

CORE COMPETENCIES: LOGISTICS

Deployment Logistics – Fully comply with Federal Travel Regulations to design and perform the global deployment of enterprise systems to more than 90 countries

CORE COMPETENCIES: INFORMATION TECHNOLOGY

Agile DevOps – Collaboratively deliver digital systems embedding security, automated testing, O&M, while supporting organizational change management and reducing risk

COTS Integration – Increased application sustainability through the use of flexible, open solutions built around configured commercial platforms

UI/UX Design – Platform agnostic, cost effective responsive web design

508 Compliance –V/GPAT, DHS Trusted Testers

PAST EXPERIENCE

PRM REFUGEE PROCESSING CENTER + WORLDWIDE REFUGEE ADMISSIONS PROCESSING SYSTEM (WRAPS) II, \$185M, PRIME

- Critical business system built in Java and .Net with 2,300+ users CONUS and 11 partner agencies OCONUS
- Processes active case data for more than 100,000 refugee applicants for the US Refugee Admissions Program
- 9 complex APIs that exchange person-vetting data with Federal immigration and law enforcement agencies such as CBP, ICE, USCIS, and FBI
- Applications and business process modernization using UI/UX user-centered design, Journey Mapping and Analysis of Alternatives
- Converged multiple legacy systems into a single shared, cloud-based ServiceNow COTS system using Agile management and development
- Ensure appropriate system security and IA according to all required OMB, NIST and Department regulations

USAID GLOBAL ACQUISITION AND ASSISTANCE SYSTEM DEPLOYMENT, \$32M, PRIME

- PRISM COTS modernization of a custom acquisition system using agile program management
- Consolidated USAID's CONUS offices and 80 OCONUS Missions into enterprise contract writing system
- Tier 2/3 and new user training support to >6,000 users to process more than \$61B in obligations
- Created and executed iterative ETL process to migrate all active award and obligation data for all Agency offices
- Created unique APIs to automatically automate creating more than 4,000 users, dramatically sped up the process and lowered error rate
- User-centered, performance-based principles to develop, maintain and deliver role-based training comprised of 80 separate training modules, 18 quick reference guides, video demos of the system, FAQ documents and brown-bag presentations

USAID TRAINING AND EXCHANGES AUTOMATED MANAGEMENT SYSTEM (TEAMS), \$10M, PRIME

- Global web-based case management system built in Grails and React with ~900 users CONUS and OCONUS that implements USAID workflow mandated by ADS 253 and 252
- Processes mandatory visa sponsorship data and digital assets for all USAID funded exchange visitors via APIs with DHS SEVIS system
- Legacy application modernization using UI/UX user centered design including user focus groups
- Full CI/CD pipeline deploying into Kubernetes containers for Azure govcloud target environment
- Migrated 900,000 records, achieved full ATO, and went live in June 2020

 Woman Owned Small Business (WOSB)

Capability Statement

Dynamic Management Associates is a Service-Disabled Veteran Owned Small Business that specializes in providing high quality management consulting services. We leverage best practice, collaborative tools, ISO 9001 quality procedures, and intellectual capital to optimize cost, schedule, and technical performance. The confluence of these factors and our close relationship with our customers enables us to effectively react to change, implement solutions, and ultimately provide best value.

Differentiators

What separates DMA from other small business competitors is the priority we place on our customers. Simply put, DMA's singular objective is to provide exceptionally rated services, and we achieve that by being indispensable to our customers. This approach has earned DMA multiple follow-on contracts and Exceptional Contractor Performance Assessment Reporting System (CPARS) ratings.

We attribute this success to

- 1) our degree of specialization
- 2) dynamic management framework
- 3) highly effective staffing and networking capability
- 4) personnel training and
- 5) leadership.

Specialization enables DMA to lower operation and recruitment costs and increase on the job performance. Our "dynamic management" framework enables DMA to improve performance and control at both the corporate and contract levels. Our non-stop staffing and network capability, benefited by specialization, shortens the time to recruit, increases the quality of candidates and lowers our attrition rates. DMA incentivizes our personnel to set and achieve annual training objectives that optimize both personal, team and customer performance. Most importantly, our cadre of strong leaders embrace DMA's commitment and is the glue that binds our specialization, dynamic management, staffing/networking, and training processes together.

Core Competencies

Financial Management. Our approach encompasses a variety of techniques, including establishing project budgets, tracking project expenditures, addressing project risk, controlling procurement costs, and the use of financial management tools and techniques. Offerings include

- Budget Preparation
- Cost Estimation
- Capital Planning and Investment
- Planning, Programming, Budgeting and Execution
- Earned Value Management
- Business Case Analysis

Program and Acquisition Management. DMA aligns your goals, objectives, and priorities for the most efficient, cost-effective program operation. Our common thread that connects our approach with successful delivery are the documented best practices leveraged within the facets of the program management lifecycle.

Offering include:

- Acquisition Management
- Change Management

North American Industry Classification System

- 541330 – Engineering Services
- 541611 – Administrative Management and General Management Consulting Services
- 541618 – Other Management Consulting
- 541690 – Other Scientific and Technical Consulting Services
- 541990 – All other Professional, Scientific, and Technical Services
- 561499 – All Other Business Services

Capability Statement

- Integrated Master Scheduling
- Program/Project Management
- Risk Management
- Contract Administration
- Governance

Planning and Analysis. We analyze needs, recommend solutions, and implement the solution to drive improvement. Our experts are skilled at researching and analyzing complex programmatic problems and developing solutions that are aimed at improving program performance. Offerings include:

- Acquisition Planning
- Knowledge Management
- Strategic Planning
- Portfolio Management
- Operations Research
- Data Analysis
- Business Process Reengineering

Systems Engineering. DMA provides engineering services in core areas of enterprise architecture, acquisition engineering and systems engineering. Offerings include:

- Acquisition Engineering
- Enterprise Architecture
- Software Engineering
- Systems Engineering
- Technical Advisor

DNI Proudly Supports OBO and IRM

Bureau of Overseas Buildings Operations (OBO)

A Department of State Agency Wide Professional Staffing Solutions IDIQ. These two contract vehicles provide professional services staffing to meet the performance objectives and business requirements for OBO.

Bureau of Information Resource Management (IRM)

DNI supports the Bureau of Information Resource Management as the prime integrator supporting SAFE, the first ever FedRAMP authorized crisis communication solution. The deployment of SAFE provides the DoS with cloud-based architecture to support a centralized, enterprise-level, web-enabled mass warning and communication system.

“SAFE Support Team, I would like to thank you for the excellent support this week. As you are aware, we had a hectic schedule, and made a few discoveries within the SharePoint site, the SAFE application, and the training material. The SAFE support team assisted us with several on the spot corrections saving valuable time of the remote team and confusion of the end users. The SAFE support team provided detailed responses to post(s) technical and program level questions. The responses and level of detail within them demonstrate the teams understanding of the system, the customers, the program goals and your commitment to outstanding customer support.”

About ECODIT

Year Incorporated: 1993
DUNS Number: 111092144
CAGE Code: 3G0J3

Primary Areas of Expertise: Communication, Energy, Environment, Water

Recent Overseas Experience: Cambodia, Democratic Republic of Congo (DRC), Kazakhstan, Kyrgyz Republic, Lebanon, Niger, Vietnam, Zimbabwe

APPROACH

ECODIT is a recognized leader in bringing people and ideas together to create a positive lasting impact on individuals and institutions. At ECODIT, we believe that technologies and policies can produce long-lasting positive outcomes only if the organizations responsible for them share common vision and values, empower their staff and constituents to think and act creatively, and incentivize them appropriately. To achieve enduring results, we bring together people with know-how, innovative ideas, and proven talents, and we work side-by-side with them to design, develop and implement programs that are adapted to their situation and needs. ECODIT is an ISO 9001:2015 certified company, recognized for striving to ensure that services meet clients' requirements and that quality is continually improved.

CAPABILITIES

ECODIT has provided an extensive range of professional services and has implemented more than 250 projects for diverse clients in more than 50 countries. This includes experience managing complex, multi-million-dollar U.S.-based and overseas projects and contracts for the United States Agency for International Development (USAID) with multiple technical streams and objectives. ECODIT is flexible and nimble, and stresses continuous learning, partnership, and innovation in all of its work. Our core capabilities suited specifically for the GSA OASIS SB vehicle include the following:

Program Management Services

- Program Management
- Integrated Program Management
- Project Management
- Stakeholder Requirements Analysis
- Technical Planning
- Technical Assessment
- Technical Data Management

Management Consulting Services

- Change Management
- Concept Development and Requirements Analysis
- Knowledge Management
- Social Media Consulting
- Technical Advisory Services
- Training and Facilitation
- Strategic Planning
- Strategic Forecasting
- Strategy Development

Engineering Services

- Alternative Energy Sources and Engineering
- Environmental Management
- Environmental Consulting and Remediation
- Natural Resources Management

Scientific Services

- Environmental Sciences
- Social Sciences

ECODIT PROJECT HIGHLIGHTS

Water

Environment

Energy

Governance

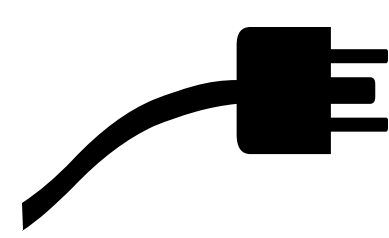

ECODIT has implemented **more than 250 projects** for diverse clients **in more than 50 countries**. This includes experience managing complex USAID projects and contracts at the country and regional levels with multiple technical streams and objectives. Below is a selection of ECODIT's ongoing and recently completed multi-year projects.

Water

USAID Water Communications and Knowledge Management (CKM) Project, \$15M, 2015 –2021

- Supports the USAID Center for Water to increase knowledge and data capture; enhance communications and outreach; and facilitate knowledge sharing and learning

Energy

Power Africa Data and Technical Support Services Activity, \$5.7M, 2019-2024

- Provides capacity building and technical and data support to the U.S. Government PA Initiative

Niger Mini-Grid Feasibility Study, \$17M, 2019-2020

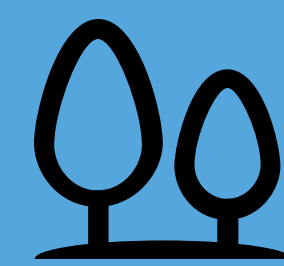

- Provided technical and economic feasibility studies for solar mini-grid sites associated with 69 telecommunications towers located across roughly 100 villages in rural Niger

USAID Central Asia Energy Links Project, \$23M, 2014-2020

- Worked with governments, public utilities, and the private sector to improve energy cooperation, trade and security throughout the Central Asia region and provided high-level leadership to the multi-donor CASA-1000 power transmission infrastructure project, which will allow Tajikistan and the Kyrgyz Republic to export seasonal surplus hydroelectricity to energy-deficient Pakistan and Afghanistan

USAID Democratic Republic of Congo (DRC) Power Sector Reform (PSR) Project, \$6.9M, 2016-2019

- Provided assistance to the Government of the DRC to revise its power sector strategy; improve energy policy; and establish, staff, and support the new Regulatory Authority and Rural Electrification Agency

Environment

USAID Lebanon Diverting Waste by Encouraging Reuse and Recycling Activity, \$15M, 2020-2025

- Works to establish sustainable and replicable integrated solid waste diversion and valorization solutions in rural areas of Lebanon

USAID USAID Zimbabwe Resilience through Accelerating New Community-based Holistic Outcomes for Resource Sustainability (RESILIENCE ANCHORS) Activity, \$19M, 2020-2025

- Builds the capacity of local partners and communities on sustainable natural resources governance to safeguard biodiversity and build community resilience

USAID Cambodia Green Future Activity, \$5M, 2019-2024

- Mobilizes civil society, government bodies, and communities to conserve biodiversity and protect natural resources

USAID Vietnam Green Annamites Activity, \$24M, 2016-2021 (REPLACE IDIQ)

- Works with provincial governments to protect Vietnam's significant biodiversity; improve land use practices; help local ethnic minority communities to diversify and improve their livelihoods; and mobilize private sector resources for conservation and livelihood initiatives

Governance

USAID Communications, Evidence, and Learning (CEL) Project, \$30M, 2018-2023 (Subcontractor)

- Supports the dissemination of evidence-based knowledge in land tenure, property rights, and resource governance, as well as in urban development, urban-based programming, and sustainable cities

A TRUSTED PARTNER FOR THE U.S. DEPARTMENT OF STATE

EnCompass is a women-owned business founded in 1999 and committed to inclusive, democratic societies. Our participatory, utilization-focused evaluations and whole-systems perspectives have made us a respected monitoring, evaluation, and learning partner for the State Department. Our teams design and deliver creative solutions, high-quality data, and learning programs that strengthen the evidence base and foster strategic planning and decision making to improve State Department activities worldwide.

CORE CAPABILITIES AND EXAMPLES OF RECENT WORK

Performance Management and Evaluation Services IDIQ (2017–2022):

- Evaluation of Population, Refugees, and Migration (PRM)-Supported Initiatives on Mental Health and Psychosocial Support
- Assessment of the Evaluation Division in the Bureau of Educational and Cultural Affairs' Evaluation Division
- For the Bureau of Democracy, Human Rights and Labor:
 - Evaluation of the Promoting Accountability, Inclusivity, and Resiliency Support Mechanism
 - Principles-focused evaluation of the Justice & Accountability Portfolio
 - Ex-post evaluation of the bureau's global Rule of Law portfolio
 - Evaluation of the effectiveness of the bureau's community organizing and mobilization programs
 - Evaluation of Iran human rights documentation efforts

Research and Evaluation Blanket Purchase Agreement for the Office to Monitor and Combat Trafficking in Persons (2017–2022):

- Baseline evaluations of Child Protection Compact Partnerships in Jamaica and the Philippines
- Process evaluation for the Southeast Asia Fisheries Project
- Performance evaluation for the Program to End Modern Slavery

Multipart Evaluation of the Global Equity Fund (2016–2017):

- Evidence from this evaluation informed a portfolio-level strategic framework to focus learning and guide grant-making decisions in support of LGBTI+ organizations and human rights defenders worldwide.

Training Design and Delivery (2014–2019):

- Bureau of Near Eastern Affairs' Office of Assistance Coordination – Design and delivery of a pilot training program, *Operationalizing Gender Integration Policies in U.S. Foreign Assistance* (2018–2019)
- Executive Leadership and Development Blanket Purchase Agreement for the Foreign Service Institute (2014–2019)

OASIS SB Pool 2 - Financial/Accounting Services

Contract No. 47QRAD18D000F

For three decades, FMS has delivered exceptional services to Federal, State, and Local customers. Found in 1989 with the mission of solving and remediating complex challenges in the delivery of Accounting and Financial Management, FMS has help Federal agencies realize their goals of improving financial management and systems; reducing improper payments; and improving grants management.

Digital transformation has impacting how an agency uses technology, people, and processes. FMS has quickly assisted agencies in leveraging proven emerging technologies of Artificial Intelligence, Machine Learning, Blockchain, and Robotic Process Automation. Furthermore, these services can be quickly procured under an Phase III Small Business Innovation Research (SBIR) award. SBIR is an avenue to reduce the administrative burden of the procurement process, supporting the attainment of small business goals, rapidly deploy our proven capabilities. Please contact us to learn more.

CAGE Code : 05HQ5
DUNS: 62-781-0476
Top Secret
ISO 9001:2015

Department of State - FMS has been a private sector partner of the Department of State (DOS), since 2001. For example, we supported former Deputy Assistant Secretary, James L. Millette with Global Financial Services consolidation efforts relocating 80+ Federal financial professionals from the Domestic Financial Services operations in Washington, DC to Charleston, SC. We have supported more than 40 complex administrative tasks simultaneously covering purchasing, logistics, human resources, customer services, budget and financial management at DOS Headquarters, and Charleston, SC. Supported DOS Bureaus include:

- Executive Office of the Secretary (S-EX)
- Office of Logistics Operations (A/LM/OPS) & (LM/RM)
- Defense Trade Controls (DTC)
- Bureau of Diplomatic Security (DS)
- Office of Real Property Management (RPM)
- Office of the Legal Adviser
- Charleston Global Financial Center
- Medical Service (MED)
- International Security and Non-Proliferation (ISN)
- Office of Acquisitions Management (AQM)
- Office of Inspector General (OIG)
- Bureau of Human Resources (HR Office of Financial Oversight – Financial Operations & Controls)

Government agencies spend enormous time and resources on the process of financial data. Inaccessible data, different business systems (FPDS, .mil, .gov, etc.) add to the complicity of settling transactions. With human-like decision-making capabilities, FMS can delivery RPA Bots that simplifies transaction-related processes saving each agency thousands of manual labor hours and millions of dollars annually, while enabling Federal employees to focus on the mission instead of low value data entry work.

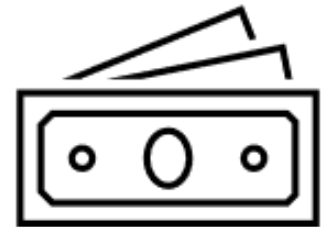

Company Overview

Futron provides technology solutions to enable successful business outcomes for our customers around the world. Our ISO 9001:2015-certified processes meet the needs of the Federal Government and Private Sector customers around the world, including DoS, in places like Iraq, Morocco, Yemen, and Costa Rica. We have a Top Secret Facility Clearance, and over 60% of our staff have clearances up to TS/SCI. We bring 26 years of experience providing Construction and IT services.

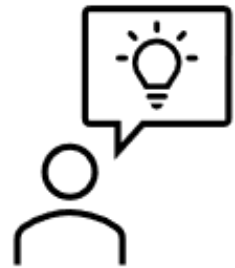

Our high quality of work, professionalism, and emphasis on customer satisfaction has resulted in several repeat clients including DoS, U.S. Army Corps of Engineers (USACE), U.S. Air Force, U.S. Navy, Department of the Interior, and the Social Security Administration (SSA). We understand how to coordinate with DoS, including extensive partnership with the Bureau of Overseas Buildings Operations (OBO), to effectively schedule and execute high-quality, on-budget projects overseas.

Our support to the Department of State has been continuous on multiple platforms. For instance, Futron was chosen to support our Department of State in Shanghai, China for an intercom installation project. Futron performed a complete design, procurement and installation, and support of this system.

Additionally, Futron provides all personnel, equipment, supplies, facilities, transportation, tools, materials, supervision, and other items and non-personal services necessary to perform audio visual (AV) equipment maintenance for the Department of State Bureau of Education and Cultural Affairs and the Bureau of International Information Programs.

TESTED - PROVEN - TRUSTED

Whether within and throughout the United States, or at the almost 290 locations around the globe, the U.S. Department of State requires real time, 24/7, follow the sun situational awareness. Graham Technologies understands better than most that real-time situational awareness is only part of the equation. While situational awareness is key for continuity of operations (COOP), situational understanding is the key to problem solving and true mission assurance. Whether it be the Bureau of Administration (A Bureau), Information Resource Management (IRM), or the Bureau of Diplomatic Security (DS), We provide the IT and Cybersecurity experience and expertise to implement the analysis and the operations necessary to adroitly plan, prepare and execute the protection, prevention, mitigation, response and recovery of an Enterprise IT network.

Whether we are assisting the Federal Bureau of Investigation (FBI) with their Cloud adoption, or shepherding an entire U.S. Army Garrison through the RMF process to attain successful ATO, or providing Tier-1 through Tier-4 Enterprise Service Desk operations within the Intelligence Community, GRAHAM provides the right solutions for our government partners using a focused and agile approach that maximizes existing resources while introducing new cost effective technology solutions designed to seamlessly integrate with legacy systems and software allowing for smooth user adoption.

Graham Technologies' Subject Matter Experts have over one hundred years of technical and operational experience providing Preparedness, Mitigation, Response, and Recovery solutions at home and abroad. Our continuous diagnostics, mitigation, and rapid recovery experience reduces down-time, while ensuring continuous operability interoperability during man-made or natural disasters. Graham's validated Risk Analysis techniques, coupled with our agile Risk Avoidance approach ensures the continuum of operations necessary for Forward Momentum.

Halvik Corp

Halvik Corp (Halvik) is a certified 8(a) Economically Disadvantaged Woman-Owned Small Business (EDWOSB), supporting over 30 U.S. Federal Government clients. Since 2007, Halvik has provided skilled professional services to provide successful outcomes to complex initiatives. We focus on building long-term partnerships with our Government customers to help them meet their mission needs. Our capabilities and expertise enable us to combine innovative technology and management solutions to modernize, secure, and sustain the business and mission essential systems of our clients today.

For nearly five years, Halvik has provided **Program and Financial Management Services** to the Department of State (DoS) to guide and manage large-scale requirements. Our staff have the skills and knowledge to deliver program and project management, budget and financial management/execution, cost management, and acquisition management, as well as general business administrative and operational task expertise and support.

HALVIK EXPERIENCE SPOTLIGHT

Halvik currently supports the National Nuclear Risk Reduction Center (NNRRC) in the Bureau of Arms Control Verification and Compliance (AVC). The NNRRC executes a complex mission to exchange notifications with foreign counterparts as required under arms control treaties and security-building agreements. Under our contract, we plan, track, and manage budget, acquisitions, and asset and professional services contract lifecycles to enable the NNRRC to focus on its mission and such that its watch officers, who staff international communications lines 24x7x365, can perform their work without interruption.

Within three months of starting work, Halvik reduced the time to prepare data call responses from weeks to days. The processes we implemented give NNRRC leadership confidence that funds are planned for and spent appropriately and effectively. These process improvements and project management saved as much as 60% on professional services and technology purchases, increased visibility and collaboration between teams, and enabled the NNRRC to meet DoS, Federal, and international (treaty-based) policies and requirements.

ADDITIONAL CAPABILITIES WE CAN OFFER

CURRENT PRIME CONTRACT HIGHLIGHTS

MONITORING, EVALUATION, AND LEARNING (MEL)

- **Roads Evaluations: Cabo Verde, Liberia, Mongolia, Moldova, Mozambique, Niger, and Philippines:** IDG has partnered with MCC for over three years on conducting performance evaluations and estimating the economic return rate (ERR) of roads built by the agency across the world.
- **LEAP II (Learning, Evaluation, and Analysis Project):** Completed in 2017, IDG implemented 36 activities in 30 countries with 4 international subcontractors, and numerous local partners to provide economic analysis and MEL services to the USAID Bureau for Economic Growth, Education, and Environment (E3).
- **EVAL ME IDIQ (Evaluation and Monitoring):** Awarded in Fall 2020, IDG brings together many subcontractors and 40 local research partners from across the globe.

PRIVATE SECTOR DEVELOPMENT

- **EDGE (Economic Development, Governance, and Enterprise Growth):** Implemented in partnership with the Europe and Eurasia (E&E) Bureau, EDGE connects with local enterprises to spur economic growth across 12 countries.
- **EDGE Buy-In:** The EDGE Buy-In supports supplemental activities as part of the EDGE project. A notable example is the privatization of state-owned enterprises in Ukraine that led to the successful auction of the Dnipro Hotel in Kyiv.
- **SAIL (Supporting Accelerated Investment in Sri Lanka):** SAIL supports streamlining the investment process by implementing activities focused on the tourism, labor, and trade sectors.

INTERNATIONAL TRADE/ BUSINESS ENABLING ENVIRONMENT

- **FtF-BITBEE (Feed the Future Bangladesh - Improving Trade and Business Enabling Environment):** FtF-BITBEE aims to bolster economic growth and food security by working with the government of Bangladesh to provide technical assistance and strengthen institutions, as well as enhance private sector competitiveness and facilitate trade.

PUBLIC FINANCIAL MANAGEMENT

- **FSTA (Financial Sector Transparency Activity):** The FSTA project in Moldova supports economic growth by combating financial crimes and systemic money laundering in the banking sector by automating shareholder transparency monitoring and building the capacity of the regulatory agencies.
- **SVIG (Support Planning, Administration and Oversight of Venezuela Interim Government):** IDG coordinates complex logistics in order to increase the management capabilities of the Venezuelan government, as well as providing technical assistance in developing the public financial management system.

INSTITUTIONAL SUPPORT CONTRACTS

- **FSSC II (Food Security Service Center):** IDG manages a consultant database of food security experts who focus on program design and management, monitoring and evaluation, agricultural growth, research and capacity building and other critical areas of food security.
- **SVIG (Support Planning, Administration and Oversight of Venezuela Interim Government):** IDG coordinates complex logistics in order to increase the management capabilities of the Venezuelan government, as well as providing technical assistance in developing the public financial management system.

Major Clients

The small business Joint Venture, **InfoPoint, LLC** was founded as part of the Small Business Administration (SBA) Mentor-Protégé program to bring together the combined capabilities of Information Gateways, Inc. (Protégé) and OnPoint Consulting, Inc. (Mentor) to federal and state government customers. Headquartered in the Washington, DC metropolitan area, InfoPoint has access to experienced personnel focused on delivering technically innovative, reliable and cost-effective solutions.

Benefits of the SBA Mentor-Protégé Program

InfoPoint was purposefully formed to provide customers the ability to work with the combined qualifications of a small and large business on small business set aside contracts or other contracts for which the protégé is eligible. Benefits include:

- A combination of agency knowledge, capabilities, and experience
- Ability to quickly bring together the right skills for meeting project needs including facility clearances & talent quality management
- A mature infrastructure to provide efficient and effective contract management and DCAA-approved accounting practices & systems

InfoPoint Core Capabilities

Cloud Services	Cybersecurity
Network Operations	Data Analytics
Data Transformation	Systems Integration
Application Development / Modernization	Strategic Communications

InfoPoint offers DOS:

- Extensive Innovative Solutions Experience at Consular Affairs (CA), Bureau of Educational and Cultural Affairs (ECA), Overseas Building Operations (OBO), Technology Division Arms Control, Verification, and Compliance (TSACIS), International Security and Nonproliferation (ISN)
- Global Strategic Digital Media Communications, Engagement, Collaboration, Marketing and Promotion Experience
- Best of Breed Communications and Knowledge Management (CKM)
- Stakeholder Relationship Building and Strategic Planning
- Business Intelligence and Dashboarding, Asset Management
- Business Transformation, Website Management and Redesign
- World-wide Enterprise Applications and Reporting, Data Modeling, Data Warehouse

ORGANIZATION OVERVIEW

Intellect Solutions provides a full suite of system design, development, integration, information assurance, and program management support services to federal clients. Our vision is "Inspired to Serve". Our core values reflect this founding principle and we manage and retain our talent based on adherence to these values. Our culture begins with a commitment to each other and teamwork, innovation and collaboration. This collective energy is then focused on providing our clients with innovative solutions to their most pressing challenges.

WHO WE ARE:

Built on decades of serving all branches of the military, Department of Defense and Civilian organizations, INTERFUZE is meticulously engineered to deliver comprehensive, innovative solutions and exceptional performance to support the Department of State's (DoS) critical missions. INTERFUZE's collaborative team of diverse and talented people – engineers, designers, scientists, logisticians, analysts, technicians, cyber/IT and business professionals – share the vision to be the Partner of Choice for government services through a relentless focus on excellence in all that we do.

INTERFUZE's wide range of core competencies provides the depth and breadth of talent necessary to address the needs of any client. Through its OASIS SB Pool 3 and 4 contracts, INTERFUZE is now able to offer Best in Class contract services.

WHAT WE DO FOR THE DoS:

- > **Mobile Command Center Operations:** INTERFUZE supports the non-medical requirements and needs of the US Air National Guard (ANG) CBRNE enterprise and civil engineering community. This included procurement, fielding, and new equipment training for eight towable Mobile Emergency Operations Centers (MEOCs).
- > **Planning Sustainment Support:** INTERFUZE performed planning sustainment support and was responsible for managing the planning, coordination, technical direction, and surveillance of all activities necessary to execute Customer Test Requests (CTRs) for the Marshall Space Flight Center (MSFC) Test Lab. We managed test operations and performed personnel scheduling to maintain sufficient numbers of employees to manage facilities and test equipment to meet the schedule safely.
- > **Environmental Compliance and Restoration:** INTERFUZE provides project management, knowledge capture, and operational management to the Recovered Chemical Material Directorate (RCMD). This includes operations support for the safe storage, treatment, and disposal of chemical materials. Efforts include supporting full live operations at Pine Bluff Arsenal, AR to treat and destroy various agents, including Mustard gas, using an Explosive Detonation System.
- > **Test Support and Operations:** INTERFUZE provided Marshall Space Flight Center (MSFC) with test support and operations services for tests and hot fires annually as it developed the Space Launch System (SLS), and Environmental Control and Life Support Systems for the International Space Station (ISS). INTERFUZE also provided test support to other NASA centers, commercial customers, and DoD.
- > **Range Operations and Maintenance:** INTERFUZE provided operation and maintenance of the Eglin test and training areas and technical facilities, test and training mission support, engineering support for range system design/modification/range configuration, and range support services required to accomplish authorized range activities.

ENGINEERING HUMAN ACHIEVEMENT

We are a collaborative, synergistic team of diverse and talented people. Focused on our core values, our servant leadership exhibits the principles of excellence through modeling ethical, caring behavior and prioritizing client success and staff growth. This commitment to take initiative to do great work every day produces excellent results.

RELEVANT EXPERIENCE:

Cybersecurity, Analytics and Network Defense

INTERFUZE provides the U.S. Army Corps of Engineers Engineer Research and Development Center Office of the Chief Information Officer (OCIO) cybersecurity, network analytics, and defense services. We manage, coordinate, and execute the phased implementation of IT assets across the spectrum of network devices and protocols. This includes network access control as well as implementation of the posturing for network access and quarantining based on policy compliance.

INTERFUZE services include program management, pre-project planning workshops for key stakeholders, including network engineers, system administrators, and cybersecurity, and CISCO Identity Services Engine (ISE) readiness assessments. We provide both high level and low-level design support, identifying and diagramming the various project components and the integration of those components. We provide as-built documentation, including passwords for appliances and written instructions for all necessary policies.

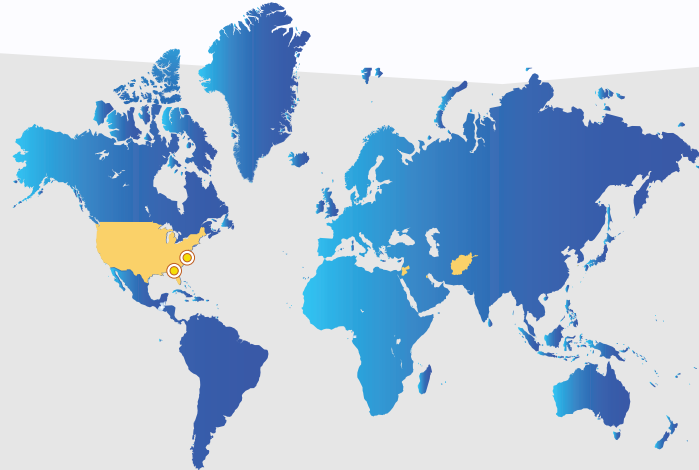

Integrated Logistics Support

INTERFUZE is a recognized leader in operations and integrated logistics support with unrivaled past performance on complex programs that support warfighters and military service members across the world.

As the contractor responsible for running DCRF we analyze data to deliver insights to all phases of the equipment refresh (inventory and inspection, refresh, and recertification) through all refresh cycles. We provide logistics, procurement, sustainment, and training for COTS CBRNE equipment and services supporting the CBRNE Response Element.

We instituted annual “trend analysis” reviews with the government that take into consideration of usage rates, consumption rates, vendor lead items which provides our customers with the data needed to manage program risks effectively. This provided shortened turn-around time, faster equipment repairs and timely replacement actions, resulting in increased mission-critical equipment operational availability of 99% (12 month rolling average).

Whether your logistics requirements call for long-term sustainment or short-term training, we provide product support and sustainment solutions providing warfighters with the tools they need to succeed. Let our skilled professionals lead the development of your logistics program and we will deliver a cost-effective solution.

Our operations around the Globe, include:

- | | |
|-----------------------|------------------|
| Huntsville, AL | Clovis, NM |
| Montgomery, AL | Fayetteville, NC |
| Oceanside, CA | Jacksonville, NC |
| Ft. Walton Beach, FL | Hillsboro, OR |
| Panama City Beach, FL | Stafford, VA |
| Albany, GA | Afghanistan |
| Vicksburg, MS | Jordan |
| Edgewood, MD | Kuwait |
| Salem, MO | |

THE INTERFUZE DIFFERENCE:

- > 84,000 square foot warehouse with systems integration lab.
- > Diverse, highly-valued team of trainers supporting end users.
- > 15-year history supporting hundreds of millions of dollars in procurements.
- > Proven track record of total life-cycle contract logistics support.

Critical Infrastructure Protection for U.S. Embassies

Security Management System for Critical Infrastructure Protection

Chief Security Officers, Chief Financial Officers, Chief Risk Officers, Law Enforcement Officers and Antiterrorism Officers responsible to the protection, management, and operational sustainment of operations, facilities, and critical capabilities within an organization should ask themselves the following questions:

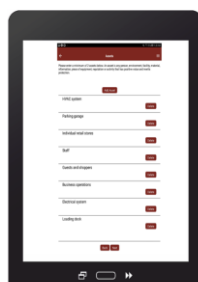

- Do you know if your Critical Infrastructure Assets have been properly assessed for vulnerabilities.
 - How did you systematically evaluate and technically measure this?
 - How are you prioritizing the importance of each asset to your security enterprise?
 - Are they assessed individually on their own?
 - Did you evaluate them as integrated parts of a larger business enterprise?
- In an environment with limited resources and scarce personnel numbers, how accessible are your organizations most sensitive and valuable equities from a hostile penetration or civil disorder event?
- How quickly could your production facilities or distributions centers recover and resuscitate to full operations if they experienced a catastrophic cyber-attack or natural disaster?
- How fast could you truthfully respond to Senior Leadership if asked the questions above?

Our security management system (SOTERIA) includes a mobile app and a web based backend comprehensive security threat analysis and vulnerability evaluation tool that meets the needs of federal agencies who are responsible for finance, risk, security, and facility management operations who have enterprise level responsibilities to secure/safeguard and manage large volumes of critical assets, to include production, distribution, and manufacturing facilities, as well as retail and commercial properties. We offer the ability for senior leaders to have a tool that allows for threat/vulnerability assessments to be conducted in real-time with a comprehensive report generated in days versus weeks. This is accompanied by a proprietary back-end system that monitors both your facilities and critical assets to ensure compliance with regulatory governance standards, to include safety, health, or security requirements with an executive level dash-board via a speedometer view for senior officials. SOTERIA provides a systematic way to provide strategic supervision, oversight and the ability to track/monitor identified vulnerabilities in real-time for all 16 Critical Infrastructure Sectors.

The mobile application is used at the tactical level to give security professionals a step-by-step process to perform a critical infrastructure asset vulnerability assessment using the **Criticality, Accessibility, Recoverability, Vulnerability, Effect and Recognizability (CARVER)** methodology. By using this proven methodology, both experienced and inexperienced personnel can conduct expert-level security threat analysis and vulnerability evaluations without being restricted by a lack of experience or expertise in security or counterterrorism operations. As a user-friendly product, our mobile application was designed by critical infrastructure protection subject matter experts in a simple question and answer construct.

Mobile Application Main Screen: All assessments assigned to an identified Antiterrorism Officer will populate when they sign into their mobile device.

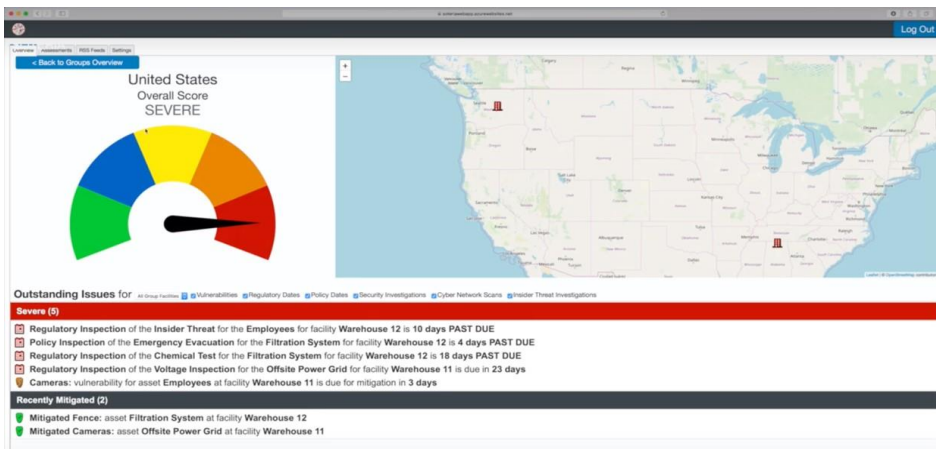

Mobile Application Asset Screen: Critical infrastructure assets that were identified during the assessment are captured and assessed for identified vulnerabilities.

Mobile Application Summary Charts: Snapshot in time of the assessment can be immediately provided to the Site Security Manager/Chief Security Officer.

Critical Infrastructure Protection for U.S. Embassies

Chief Security Officers will have the ability to track/ monitor their entire enterprise via speedometer indicators using one singular dashboard tied to each location. This feature will provide a reduction in liability through a holistically persistent management of risks and governance of People, Information, Equipment, Facilities, Activities & Operations.

Our automated security tool informs security-related policy, decision-making, and resource allocation, not only by the private industries, but also by itself in targeting needs for remediation, countermeasure, capability building, technical assistance, and making policy decisions.

Past Performance

Intrepid has past performance/expertise providing emergency management, continuity operations, intelligence support and security management advisory services across the spectrum of all critical infrastructure environments within the federal, industrial, and commercial enterprises. Our subject matter experts have performed a range of services pertinent to the operational needs of the U.S. Government and have diverse backgrounds from the U.S. Intelligence Community, U.S. Special Operations Command, Missile Defense Agency, U.S. Army, and law enforcement environments. Our past performance includes but is not limited to security threat analysis and vulnerability evaluation assessments of intermodal transportation centers, intelligence & security support to the Department of Defense, and advisory services high-visibility / high-dollar value commercial clients, both domestically and internationally.

Award Nominations

SOTERIA was nominated in Two Categories at the 2020 Security & Fire Excellence Awards in London:
- Security Software Manufacturer of the Year
- Security Solution Innovation of the Year

One Acquisition Solution for Integrated Services

OUR CUSTOMERS INCLUDE :

IronMountain Solutions (IMS) is a technology solutions company headquartered in Huntsville, Alabama pursuing OASIS Pool 3 contracting opportunities with the US Department of State that align with our proven capabilities. IMS provides our customers with expertise in engineering, program management, logistics and information technology services. We pride ourselves in our commitment to "Extreme Customer Focus" by showcasing our core values of integrity, quality, dedication and solutions in our work. The IMS team works hard to hire the best employees and take care of their needs so that they can focus on our customers. IronMountain Solutions has made the Inc. 5000 list for the past 8 years in a row as one of the nation's fastest-growing private companies and has been recognized for 5 consecutive years as one of Huntsville's "Best Places to Work."

IMS CAPABILITIES COMENSURATE WITH DOS PROCURMENTS

Engineering Services: IMS delivers the full spectrum of systems engineering services with considerable experience within the Department of Defense (DoD) and aviation technologies. Our proficiency and significant knowledge includes program integration, modeling, testing, risk management, and architecture design within multiple platforms and systems. We provide technical solutions and services for the integration of software, hardware, mechanical, electrical, and propulsion systems with a forte in the management and support of airworthiness and aviation test programs.

Test: Our extensive experience with testing originated within one of the US Army's most significant test facilities and continues to be one of our core strengths. Our test engineers provide test plans, procedure development, and analysis review across a variety of Army test programs. IMS flight test engineers oversee formal qualification, acceptance, engine performance, electromagnetic interference, environmental, and calibration/correlation test activities. IMS test professionals play critical roles with the Test and Evaluation Master Plan (TEMP) development for key programs within the US Army Futures Command.

Program & Project Management: IMS is a proven leader in program management and programmatic support consisting of validating requirements, developing capabilities, planning, programming, budgeting, and mitigating programmatic risks. Our DoD support encompasses OEM coordination, contracts oversight, earned value management, tech data management, contract management, configuration management, and foreign military sales. We are also experts in acquisition strategy development, technical evaluations, and material development decision participation.

Logistics: IMS takes a customer-centric approach to logistics support services that includes provisioning, life-cycle management, training, and property accountability. We provide dependable Integrated Logistics Support (ILS) to several DoD agencies that involves scheduling, tracking, risk assessment, mitigation and operational support. We specialize in managing maintenance, repair, modifications, supply chains, operational support, and risk mitigation. Our logisticians are adept in technical writing, infrastructure services, inventory management, and property tracking.

Cybersecurity & Information Assurance: IMS helps protect some of the DoD's most valuable weapons platforms through the development, accreditation and tracking of Risk Management Framework (RMF) packages as well as the creation of RMF access only software packages. Our solutions advance adaptive strategies for security assurance in accordance with DISA Security Technical Implementation Guides (STIGs), the development of IA and Cybersecurity requirements, and the tracking of certification and training. We are experienced with the Enterprise Mission Assurance Support Service (EMASS), system scanning, security assurance, and Plan of Action and Milestones Development (POAM).

IT CONCEPTS

INCORPORATED | DRIVEN TO DELIVER.

ITC was founded on the commitment to service and innovation

Who We Are

IT Concepts, Inc. (ITC) is an award winning, SBA 8(a), CVE-certified, Service Disabled Veteran Owned Small Business relentlessly driving quality and innovation and turning passion into client service for 17+ years

What We Do

- Management Consulting**
 - Digital Transformation
 - Business Process Re-engineering
 - Change Management
 - PMI/PMBOK & Agile/SAFe
 - Human Capital Information System Modernization
 - Workforce Analytics
- Data Services**
 - Governance & Data Management
 - Data Architecture & Modeling
 - Infrastructure and Security
 - Mining, Analytics & Visualization
 - Data Transformation & Migration
 - Data Science: Machine Learning & Artificial Intelligence
- IT Services**
 - Agile System & Software Development
 - User Centered Design & Testing
 - DevSecOps Engineering
 - Enterprise Architecture
 - Technology Evaluation & Prototyping
 - Cybersecurity

What Sets Us Apart

ITC is an experienced government consulting firm with 12+ PRIME contracts across 6 Federal Agencies

Specialized expertise in the areas of cloud services, DevSecOps, and data science – working with platforms/tools such as AWS, ServiceNow, and Tableau

Our cleared & credentialed management team and consultants provide best in class delivery quality and customer service

“Driven to Deliver” is not only our motto, but our mission

Notable Past Performance

United States Air Force

- **Management Consulting:** Responsible for driving capability modernization through digital transformation, refreshing and decommissioning software/hardware, and business operations value framework
- **Data Services:** Create and maintain data pipeline architectures to process large/complex data sets
- **Data Services:** Implement Reinforcement Learning features at the application and database level
- **Data Services:** Build optimization and simulation models for highly complex processes
- **IT Services:** Implement a comprehensive cloud suitability assessment framework to facilitate legacy and non-legacy applications and system migrations

Social Security Administration

- **Management Consulting:** Provide strategy, planning and program management services across 10+ SSA offices/divisions in support of SSA's IT modernization and digital transformation goals
- **Data Services:** Develop a predictive model to enhance SSA's to ability to assess and process severe health disability claims – expedited processing time from weeks to days
- **IT Services:** Support enterprise-wide IT and programmatic support services, for 62k federal employees across 1,500+ facilities and 1,200 field offices advising on application development, infrastructure support

Defense Intelligence Agency

- **Data Services:** Support the identification of emerging industry solutions and advanced technologies that improve data ingestion/exploitation
- **Data Services:** Develop serverless applications using ML algorithms to collect, harmonize and analyze intel data
- **Data Services:** Create deep-learning neural networks to identify anomalous records within a range of time-series and geospatial datasets
- **IT Services:** Create centralized, microservices-based environment leveraging DevSecOps; deployed 60+ microservices and 23 applications
- **IT Services:** Maintain 250+ AWS EC2 Instances

ITility, LLC

One Acquisition Solution for Integrated Services

About ITility

ITility provides program management, operations support, and information technology (IT) solutions and services to support the daily mission and business operations of our clients. We are dedicated to supporting our customer's abilities to protect U.S. National interests while operating in a dynamic and diverse global environment. We use advanced and emerging technologies to ensure immediate connection, sharing, and assured access to information capabilities among our customer's mission partners. ITility currently supports the provision, operation, and assurance of command and control information capabilities, as well as a globally accessible enterprise information infrastructure that directly supports joint warfighters, senior leaders, and other mission and coalition partners. Our team has the skills, experience, and the passion to deliver the services and solutions that will help our customers retain the agility and flexibility to respond to a broad range of requirements.

ITility Core Capabilities

- Program Management
- Operations Support
- Education and Training
- Acquisition Management
- Enterprise Services
- Data Management
- Cybersecurity Operations Support
- Systems Engineering & Integrated Solution Management
- C4 Systems and Intelligence Support
- Emergency Action Plan (EAP) Development, Training, and Execution
- Continuity of Operations Planning
- Waste-to-Energy Solutions
- Research and Development

Modular, Scalable Renewable Energy Solutions

ITility offers turnkey renewable energy technologies, and expeditionary installs by providing customized anaerobic digestion technology that makes it possible to extract energy from agricultural or food waste. Our localized, small format, modular systems provide a streamlined waste-disposal supply chain. Using the mechanism of anaerobic digestion, the discarded organics provide energy-rich methane to be used as a fuel source, and reliable, consistent fertilizer as a much-needed amendment for nutrient poor soils.

Global Support Experience

ITility has extensive experience preparing personnel for OCONUS assignments and travel, executing deployment requirements, and providing support to personnel performing overseas. We have led and executed multiple contractual efforts as a prime contractor in theaters and Unified Combatant Commands to include the countries of Qatar, UAE, Japan, South Korea, Guam, Italy, United Kingdom, and Germany.

Our Customers

- US Air Force
- US Army

Excerpts from CPARs Ratings

"Contractor did an exceptional job of understanding the needs of the government and the customer. Communication was excellent, and the technical expertise was outstanding. Contractor was devoted to ensure the government agency was informed on issues that would affect project modernization."

"JCS has been extremely agile in the ability to integrate stakeholder requirements from across the Army and the Department of Defense as components of the Army [Special Access Program] SAP Enterprise Network Modernization Strategy."

"The contractor provided extremely proficient and professional staff who provided early communication and high quality services. The program manager did a great job of indentifying concerns, problems, and impediments. Very cooperative and professional team at all times. The few concerns we did run into were mitigated and addressed by the PM and JCS immediately. This exceptional program management was a great benefit to the Government in meeting this important mission."

PERFORMANCE HIGHLIGHTS

Environmental Protection Agency:

Kalman provided program management services to the Airborne Spectral Photometric Environmental Collection Technology program, the Nation's only 24/7 airborne, stand-off, chemical and radiological detection, infrared and Photometric imagery platform.

Joint Program Executive Office for

Chemical, Biological, Radiological and Nuclear Defense: *Kalman supports product developers, program managers, and stakeholders, leveraging our comprehensive knowledge in research, development, acquisition, fielding, international operations, risk management, public relations, and lifecycle support of CBRN equipment, to develop and implement advanced medical systems, medical countermeasures, public-private infrastructure expansion, and to develop and field CBRN sensors, PPE, and rapid response bio-surveillance systems.*

United States Marine Corps: *Kalman serves as a trusted advisor to over 150 Program Offices, including IT, intelligence, and sensor systems. Our integrated solutions comprised life cycle cost estimates, economic analyses, financial management, data analytics, business intelligence and risk analysis.*

ABOUT KALMAN

Kalman & Company, Inc. (Kalman), a Small Business Association (SBA)-certified Woman-Owned Small Business (WOSB), has been at the forefront of acquisition, program analysis, logistics, business, and process improvement support services for federal and commercial clients since 1986. We are located in over 40 domestic and international locations and provide quality professional support services to our diverse client base, which includes the Environmental Protection Agency (EPA), Department of State (DoS), United States Marine Corps (USMC), Navy (USN), Army (USA), Joint Forces, and Department of Homeland Security (DHS). Kalman's reputation for quality is a product of our commitment to hire and maintain a talented, qualified workforce and to strategically partner with both large and small companies that provide additional breadth of targeted resources for the right clients at the best value.

CORE CAPABILITIES

Under OASIS Small Business Pool 3, Kalman provides the professional expertise, responsiveness, and flexibility needed to deliver quality, service-oriented products across the full-spectrum of capabilities within NAICS 541330 Engineering Services, Exception A, Military and Aerospace Equipment and Military Weapons at a sound financial value.

ACQUISITION SUPPORT

- **Acquisition Logistics:** Authoritative performance-based logistics methodologies to help maximize operational effectiveness and readiness across all acquisition phases.
- **Capabilities Development:** Comprehensive advisory services enabling effective integration of emerging technologies into ground vehicle platforms, weapons systems, and C4I infrastructure requirements.
- **Engineering Services:** Expert design, development, implementation, test and evaluation, and sustainment services in support of materiel solutions for DoD and Federal Agencies.

MANAGEMENT CONSULTING

- **Program Management:** Centralized services for planning, organizing, staffing, and controlling programs throughout system lifecycles. We apply lessons-learned and expertise from leading subject matter experts to overcome the toughest program challenges.
- **Strategic Planning & Policy Development:** The right strategy can mean the difference between success and failure. We provide analytical consultative services to DoD and Federal clients to develop strategies and policies to effectively initiate, develop, acquire, sustain, and manage systems and services.
- **Social Media:** Strategy development services that help build client online presence and engagement with target audiences.

SCIENTIFIC SERVICES

Expertise in chemical detection, spectroscopy and sensors development to help clients achieve mission-critical objectives, whether for R&D planning or responding to national emergencies.

BUSINESS ANALYTICS

- **Decision Analysis:** Rigorous analytical methodologies for Life Cycle Cost Estimates, Risk Analysis, Business Case Analyses, and Analysis of Alternatives to optimize resource decisions in constrained environments.
- **Advanced Data Analytics:** The latest in AI and machine learning capabilities, leveraged through our cloud-based NIST 800-171-compliant Microsoft Azure® environment, to drive superior data insights for customers.
- **Financial & Resource Management:** Efficient resource planning through Earned Value Management; Planning, Programming, Budgeting and Execution Management; and Integrated Master Scheduling.

INTEGRATED LOGISTICS SUPPORT

- **Fielding, Deployment, Training:** Total package fielding support spanning equipment deployment, field maintenance, and user training to prepare personnel for mission success.
- **Maintenance & Asset Management:** Proven asset management expertise (asset kitting, staging, shipping, and repairs) to streamline supply chain processes and architectures.

CORPORATE INFORMATION

YOUR MISSION – OUR TEAM – ONE SOLUTION

KSJ & Associates, Inc. (KSJ) was established in 1996 to provide high quality innovative business management, IT services and solutions to support the Federal Government's mission in healthcare and emerging markets. KSJ's value proposition is ingrained in its People, Processes, Tools and the ability to be on the leading edge of Innovations to support the Department of State requirements. KSJ advocates innovation in all we do; it is the wrapper for our People, Processes and Tools. KSJ expertly manages innovation to minimize disruption and risk and uses innovation to provide mechanisms to bring continuous value creation. An enterprise must innovate as it grows and KSJ enables our customers to remain relevant into the future, embracing new ideas and strategies to transform communication and collaboration.

CORE OFFERINGS

- Integrated Program and Project Management Support
- Acquisition Management Support
- Portfolio Management and Financial Support
- Systems Engineering, Architecture and Technical Services
- Training – Remote and Point of Service
- Program Affordability Management
- Cybersecurity

EMPLOYEE CERTIFICATIONS

KSJ employees hold 16 different certifications and credentials including:

- Project Management Professional (PMP)
- Certified ITIL Foundation
- Total Quality Management (TQM)
- Certified Internet Security Professional (CISSP)
- Certified Cost Estimator/ Analyst (CCEA)

CORPORATE CERTIFICATIONS AND DESIGNATIONS

- Small Business
- DCAA Approved Accounting System
- ISO 9001:2015 for IT Management, Technical Support and Consulting Services
- Virginia Values Veterans Certified
- KSJ President Jaja Martinez awarded Stevie's 2017 Female Executive of the Year

OUR PEOPLE

KSJ's insights, relationships, comprehensive knowledge, and experience supports the strategies and mission objectives of the Department of State

- Strong emphasis on individualized employee education and certification
- Triangulated assessment of customer requirements, corporate staffing strategy and employee enhancement drives training policy
- Retention of employees and preservation of knowledge achieves proven staffing flexibility and agility resulting in customer mission success
- KSJ University trains employees in skills needed for their work environment and provides the pathway for employee career development and retention
- Emphasis on professional certifications underpins mission success by enhancing employee skills and knowledge
- Certifications show personal commitment to their profession while bridging the gap between academic education foundation and today's technical and business demands

PROCESSES

- KSJ developed and maintains customer acquisition procedures, templates, and methodologies, in full compliance with legislation, guidance and federal requirements
- The use of repeatable, documented processes enables KSJ customers to simplify, streamline, and successfully complete acquisitions of IT solutions
- KSJ's ISO 9001:2015 registration demonstrates our passion and capability to ensure process quality, and commitment to applying best practices in all we do
- All KSJ managers are required to have ITIL training to assure the use of best practices for service delivery and continual service improvement
- KSJ's Quality Policy requires that every employee must complete KSJ Annual Quality Management Training through our KSJ University

TOOLS

- KSJ continually introduces new automation and tools to maximize performance, increase flexibility, and reduce cost and risk for the Government
- By seeking technologies to improve productivity, reduce costs, streamline processes, and seamlessly deliver accurate information to decision makers, we empower our customers with complete oversight and control of their domain
- KSJ identifies, evaluates, and recommends new tools (e.g., JIRA, AppDynamics, ServiceNow), and optimizes use of our customer's existing tools and assets
- Tools facilitate KSJ to effectively support process coordination and tracking. They support reporting, real-time management and communication of mission-critical information

SECURITY, RESILIENCY, AND STEWARDSHIP

A shared commitment to conserving natural resources and sustainable operations

HUBZone Certified Small Business, OASIS SB Pool 1

The Department of State (DoS) has an eco-diplomacy mandate that emphasizes the practice of conducting international relations by facilitating and advancing a shared commitment to conserving natural resources through sustainable operations and responsible environmental stewardship. A focus on low carbon growth, a shift towards renewable energy, and measuring impact sets the stage for the Department to showcase American leadership through best practices, informed policy, and sustainable technology. Marstel-Day can continue to support DoS's mandate through:

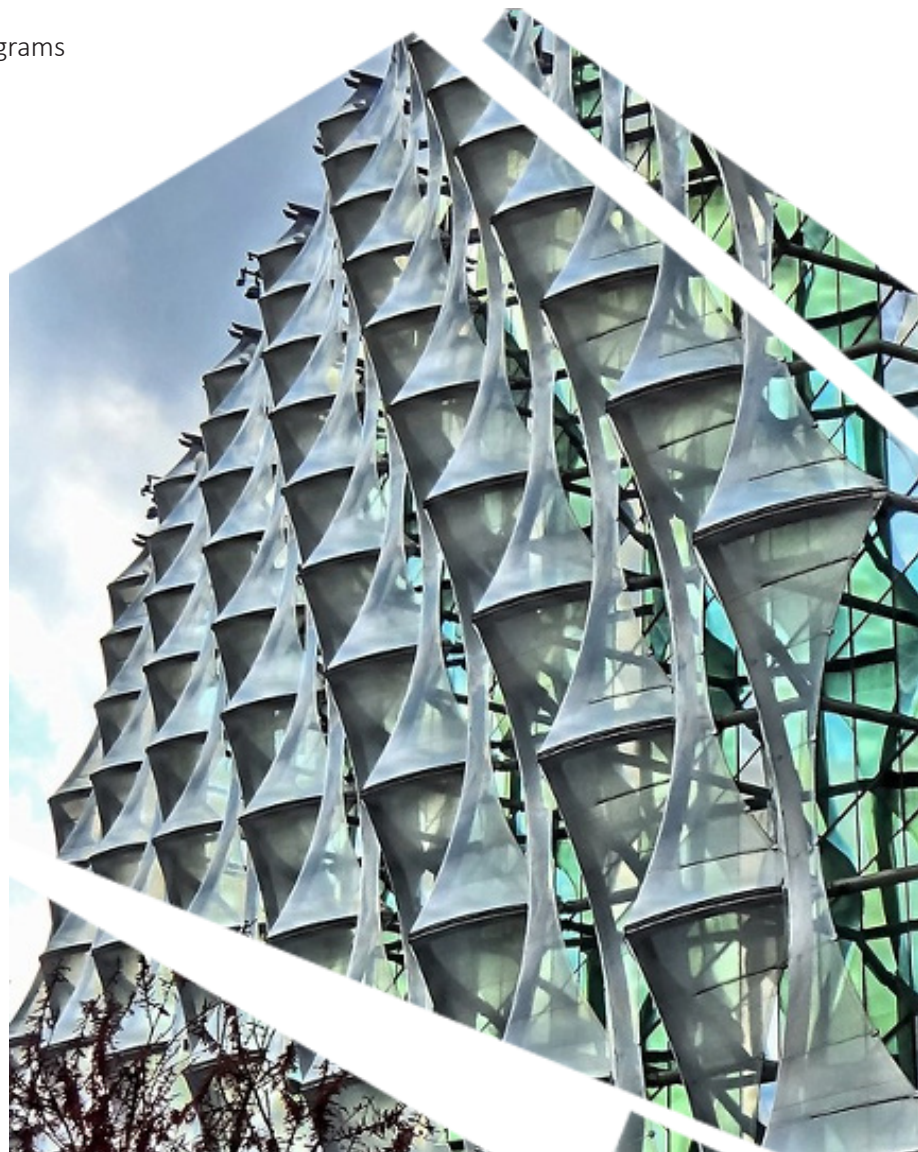

- Design of enterprise-wide climate security initiatives
- Environmental compliance and safeguarding protocols
- Resilient building design and encroachment services
- Natural and cultural resources management programs
- Scalable environmental planning; energy, water, and climate resilience; and conservation and compatible land use initiatives

Marstel-Day is now even more accessible, as an OASIS Small Business (SB) Pool 1 holder. OASIS Indefinite Delivery Indefinite Quantity (IDIQ) contracts providing a comprehensive range of professional services delivering experience and innovation in support agency missions worldwide.

The purpose of OASIS SB is to meet the needs of customers with complex integrated professional service based requirements who cannot use, or find difficulty using, the MAS Schedules, Government-wide Acquisition contracts (GWACs), or other existing vehicles for a solution.

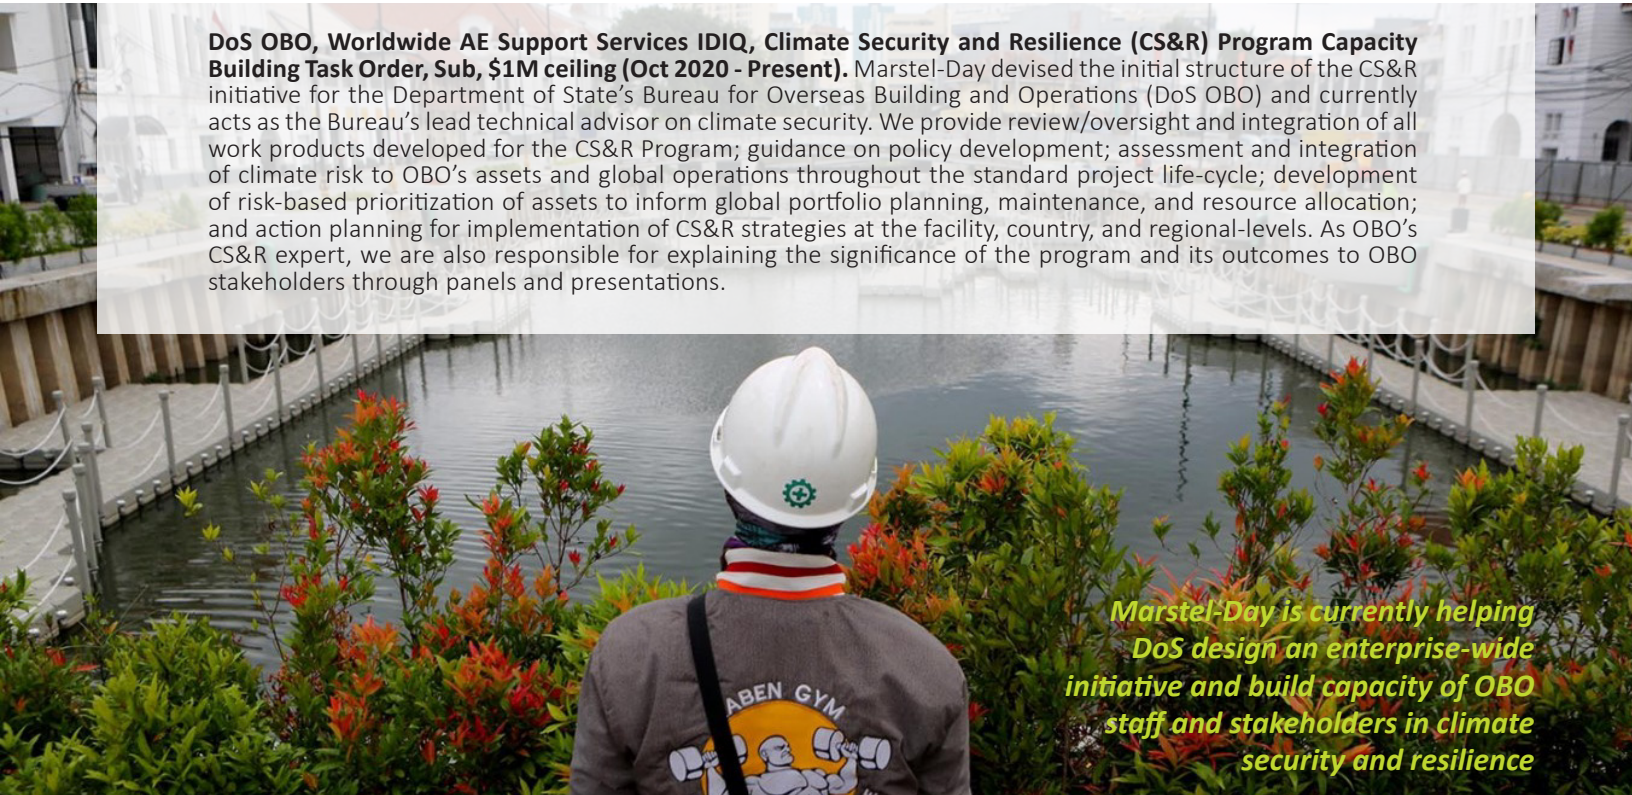

OASIS "Best in Class" contractors are unique in being able to provide highly professional, flexible and innovative solutions for complex professional services across a range of services. Learn more about our OASIS contract here: <https://www.marstel-day.com/oasis-schedule>

CLIMATE RESILIENT DESIGN

Building Capacity for DoS OBO in Climate Security and Resilience

DoS OBO, Worldwide AE Support Services IDIQ, Climate Security and Resilience (CS&R) Program Capacity Building Task Order, Sub, \$1M ceiling (Oct 2020 - Present). Marstel-Day devised the initial structure of the CS&R initiative for the Department of State's Bureau for Overseas Building and Operations (DoS OBO) and currently acts as the Bureau's lead technical advisor on climate security. We provide review/oversight and integration of all work products developed for the CS&R Program; guidance on policy development; assessment and integration of climate risk to OBO's assets and global operations throughout the standard project life-cycle; development of risk-based prioritization of assets to inform global portfolio planning, maintenance, and resource allocation; and action planning for implementation of CS&R strategies at the facility, country, and regional-levels. As OBO's CS&R expert, we are also responsible for explaining the significance of the program and its outcomes to OBO stakeholders through panels and presentations.

Marstel-Day is currently helping DoS design an enterprise-wide initiative and build capacity of OBO staff and stakeholders in climate security and resilience

Marstel-Day's provides DoS with expertise in the interrelated areas of climate, water, resilient infrastructure, public-private partnerships and next dollar investment strategies, energy, compatible land-use and other natural resource conservation issues. We design concepts, strategies, and plans of action for Bureau's whose mandates rely on using a systems approach towards resiliency, smart growth, and the management of environmental and social issues relating to encroachment pressures.

Bureau of Overseas Building and Operations

Bureau of Oceans and International Environmental and Scientific Affairs

Bureau of Population, Refugees, and Migration

Sustainability Vision-setting and Road-mapping. Marstel-Day plots pathways to enable innovation-based growth and reduce exposure from climate change. Our fit-for-purpose approach helps OBO develop short- and long-term strategies and plans; institute frameworks and criteria for risk screenings; assess organizational design and build individual and institutional capacity; conduct independent analysis and research on vulnerabilities and risk; develop climate security plans and policy; provide training, conveying, and facilitation support; and develop KPIs and metrics for performance management.

Private-sector Investment and Transboundary Governance. Marstel-Day works at the nexus of conservation and sustainable management in some of the world's most ecologically and economically important ecosystems. We assess both direct and indirect water security threats, craft policy and protocols that combat wildlife trafficking, address air quality and downstream pollution, improve governance through energy efficiency and water conservation, and create multi-stakeholder land and seascape programs to protect traditional marine industries and fisheries and coordinate landscape-scale agriculture preservation to prevent incompatible development and protect habitats.

Social Safeguarding and Addressing Gender-based Violence (GBV) Linkages. Marstel-Day supports humanitarian diplomacy by working closely with foreign governments, international organizations, private sector, academia, civil society, and NGOs to support protections and enforce safeguards for vulnerable populations around the world. We design grievance and redress mechanism to support conflict resolution, address linkages between GBV and payment for ecosystem services programming, and engage international and localized social scientists and experts trained in IFC performance safeguard standards and forced relocation policy protocols to solve multi-faceted problems.

Services for the United States Department of State

McManis and Monsalve Associates, Inc. (MMA) holds an OASIS Small Business Pool 1 contract (GS00Q14OADS126), an indefinite delivery contract that was awarded to MMA on June 20, 2014. The indefinite delivery contract is funded by the Federal Acquisition Service. The NAICS Category for the award is 541330 - Engineering Services. The PSC Category is R408 - Program Management/Support Services.

MMA Capabilities

Intelligence and Language Services — MMA provides comprehensive language and intelligence services across a wide variety of federal government agencies around the world.

Facilities and Security Services — MMA has proven experience providing skilled facilities support, security services staff and SME's ranging from staffing services to outsourced facilities and security operations.

Administrative and Professional Services — MMA's professional services assist clients to meet their mission requirements. We provide a range of staff augmentation services for Federal agencies. We have the capability to provide administrative personnel to experts supporting high-level technical projects.

Language and Cultural Training Services — MMA provides tailored training services to military, special operations, and other government agencies globally. Our government and military language and cultural training services help prepare personnel for their mission and ultimately help ensure mission success.

Training and Exercise Support Services — MMA provides an array of training and exercise support from exercise planning and scenario development, immersion/live environment training to law enforcement training involving foreign languages, opposing forces, multicultural and subject matter expert role players.

Program Management and Consulting Services — MMA supports program managers and provide a broad range of consulting services to achieving critical mission success for their Agencies. We provide a range services, such as strategy development and analysis, operation assessments, organizational diagnostics, business process improvement and training, strategic communications, and financial planning.

Risk Management and Analysis Services — MMA helps mitigate risks associated with demanding environments that include budgetary challenges, changing mission requirements, regulatory compliance issues, threat risk and vulnerability assessment, risk mitigation, continuity of operations, emergency planning, program evaluation, change management and administrative services.

Healthcare Services — MMA is able to support organizations with scientific and professional services in the environmental, physical, and social sciences. We provide robust staffing augmentation to provide innovative support for our client across a range of mission spaces.

Information Technology Services — MMA IT professionals have a wide variety of skills and experience, supporting government agencies, as well as small and large businesses. Our services include architecture and engineering, analysis and design, application development, systems integration, operations and maintenance, database and information management, consulting services, and IT staffing services

About MMA

MMA has been in operation since 2000. With a “mission first approach” we proudly support a range of Federal agencies including the Department of State, Department of Defense, Special Operations, and the Intelligence Community. SSI employs hundreds of cleared professionals for the areas Administrative and Technical, and Professional Services, Program Management Services, Training and Exercise Support Services, Language and Cultural Training Services, Language Services, and Information Technology Services. MMA holds a Top-Secret facility clearance, secret storage, secret meeting capability, and has managed several SAP programs. Our team has extensive geographic experience across 45 US states, and in 22 countries and on 5 continents.

We have supported clients in austere, hostile, and high threat OCONUS, DOS, military, and other locations, including Iraq and Afghanistan. We have extensive experience providing pre-deployment training for our own staff and State, Army, Navy and SOCOM. We have deployed more than 1,200 personnel overseas since 2003. MMA is preferred vendor to our customers and has been awarded over 100 contracts and awarded more than 70+ prime contracts over the past 18 years while having consistent, profitable growth. We achieved position #421 on the 2013 Inc. 500 list of Fastest Growing Private Companies in America and Inc. 5000 for 2014, 2015, 2016 and 2017. We deliver effective, practical, and cost-effective solutions to our clients, always remaining flexible and responsive to the changing requirements.

"Your Vision is Our Mission"

MSTI OASIS Capability Overview Prepared for US Department of State (DoS)

Through the OASIS best-in-class vehicle, MSTI delivers ISO-based services to Federal and Defense customers nationwide and overseas (CONUS and OCONUS). MSTI offers a 30-year record of superior performance in areas that support the DoS mission and vision. We consistently exceed customer requirements within approved budgets and schedules. Our areas of expertise and experience can be particularly valuable to the offices directed by the Under Secretary for Management, including the Office of Management Strategy and Solutions (M/SS) and Information Resource Management (IRM). Our Services and NAICS codes within OASIS Small Business Pool 1 that are relevant to DoS are Administrative Management and General Management Consulting Services (541611) and Human Resources Consulting Services (541612).

An Equal Opportunity/Affirmative Action Employer

MSTI and its teammates is prepared to provide technical and managerial assistance to strengthen and support the US Department of State (DoS) mission in particular the offices directed by the Under Secretary for Management, including the Office of Management Strategy and Solutions (M/SS) and Information Resource Management (IRM).

Areas of Expertise

- **Program Management Support**
- **Knowledge and information management**
- **Training and implementation plans**
- **Business Process Improvement**
- **Stakeholder engagement**
- **Administrative and logistical support**

MSTI and its teammates provide a fit for purpose end-to-end Portfolio, Project, Program, Work and Asset Management approaches that are aligned across the organization in support of our partner's strategic direction. Specific benefits include:

- Projects/programs with clear accountabilities
- Reduced Re-sanctioning Expense
- Reduction in Project Overruns
- Consistent Prioritization and Communication
- Increased Reliability
- Increased resource coordination and utilization
- Visibility/transparency of project/ program costs
- Attainment to Original Project Budgets
- Predictable Portfolio, Program and Project results
- Increased Stakeholder Satisfaction

Contract highlight - Military Funeral Honors / Survivor Outreach Services (SOS)

An integrated program management (IPM) approach governs two large projects supporting over 44,000 active SOS cases and 4,100-plus funeral honor missions across 54 states/territories. We build, revise, and deliver corresponding training curricula to include planning and implementing an annual national training conference for contract and government personnel. We also support interagency policy meetings and executive-level status reports. Survivor Outreach services employ a holistic multiagency approach to provide long-term support throughout the grief process by conducting or facilitating non-clinical assessments of individual and family needs, providing information, making service referrals, coordinating childcare as needed, and following up with Survivors to resolve outstanding issues.

Contract Highlight - Army Contracting Command (ACC) – Redstone Business Process Engineering and Program Management Services

Organizational Assessment and Business Process Engineering (BPE) support is a critical component of MSTI's task to sustain and improve all design, development, and operations and maintenance (O&M) activities essential to the ACC's Collaborative Information Environment (CIE). These iterative processes lead to workflows and associated training that guides the development, maintenance, and continuous improvement of an automated collaborative platform for optimal knowledge sharing across the organization. MSTI provides both the project and program management (PMO) support to direct and guide the above BPE efforts. The technical solutions stemming from our activities have direct bearing on the Army Contracting Command's (ACC) ability to plan acquisition, develop procurements, and receive information management/technology support.

WHO WE ARE

OBXtek is a mission-focused, relationship driven company providing high-quality solutions that last. We are a diversified professional services company and employ over 500 people on more than 35 contracts at job sites around the globe. Our teams are committed to identifying, developing, and delivering innovative, mission-focused technical and logistical solutions to our civilian and military partners in the federal government.

OBXtek has provided services across multiple Department of State (DoS) Bureaus including the Bureaus of African Affairs (AF); Consular Affairs (CA); Diplomatic Security (DS); International Information Programs (IIP); International Security and Nonproliferation (ISN); Near Eastern Affairs (NEA); Political-Military Affairs (PM); and South and Central Asian Affairs (SCA). We have successfully fielded and sustained a highly competent global workforce and have successfully supported personnel in deployed positions around the world.

We were responsible for the management of a large team spread across a very large and geographically dispersed government organization. The effort was complex and had many constantly moving parts, including:

- Providing personnel with highly specialized skillsets, to include medicine and health, across a wide range of disciplines to strategic State Department locations around the world.
- Managing the travel details of multiple concurrent, temporarily assigned personnel to destinations both home and abroad to support efforts in DoS offices worldwide—often on a short-notice basis.

With approximately 300 personnel at its peak, the Professional Management and Administrative Support Services (PMASS) contract has supported a wide variety of positions for the DoS. Due to its size, we have a great deal of experience in and are highly capable of providing the right partner nation personnel to improve their ability to develop and deliver quality instructional programs as well as deliver quality logistics support.

OBXtek is experienced and adept in providing comprehensive foreign travel and life support assistance to our employees who travel abroad to perform temporary duty (TDY) assignments. OBXtek supported the DoS on 460+ OCONUS deployments, 107 of which were to areas classified by the DoS as “dangerous” or “high threat.”

Our capabilities also include:

PROFESSIONAL SERVICES

OBXtek supports the Bureau of Diplomatic Security which is responsible for the protection of U.S. personnel, official facilities, and residences domestic and overseas at over 260 foreign service posts worldwide. Our team provides program management and administrative support to the Deputy Assistant Secretary of Training. Our employees assist in managing and directing the formulation, planning, coordination, implementation, and evaluation of programs that promote the training and professional development of the Diplomatic Security personnel; specialized security training for Department of State employees, foreign affairs agencies, and their eligible family members; and training activities for certain foreign government security and law enforcement personnel.

- Technical Staffing
- Diplomatic Security Training

MANAGEMENT CONSULTING SERVICES

OBXtek provides advisory services in the area of joint planning through the Global Defense Reform Program (GDRP). Our advisors develop joint planning systems that are common to all domains of Ministry of Defense (MoD) functions, allowing for the integration of various MoD components to set the strategic vision of national security.

- Global Defense Reform Program Advisory Services
- Forward Military Counter-terrorism Program Coordination
- Human Resources Reform and Manning Evaluation

CYBERSECURITY

OBXtek provides strategic cybersecurity support to safeguard critical infrastructure and protect vulnerable platforms to meet advanced mission needs. We develop and evaluate security programs, establish complex system-wide information security standards, integrate assessment and authorization processes and documentation into organizational business processes, manage risk through risk and vulnerability assessments, as well as scan and remediate malware intrusions.

- System Assessment & Authorization (A&A)
- Vulnerability Scanning, Intrusion and Malware Detection

ABOUT

Peregrine Technical Solutions, LLC. is an Alaska Native Corporation (ANC), 8(a), Small Disadvantaged Business (SDB) and a subsidiary of Goldbelt, Inc., a large ANC based in Juneau, AK. The firm was founded in 2011 to meet the expanding requirements of cyber offense/defense activities, including full-spectrum Information Operations (IO). Over the years we have expanded our clientele and capabilities to include Systems Engineering and Integration; Security Engineering, Risk Management Framework (RMF) Assessment and Authorization; Industrial Control System (ICS) Cybersecurity, Enterprise Architecture: Information Technology (IT) Operations and Maintenance (O&M); Software Engineering; and Administrative and Clerical support services.

DEPARTMENT OF STATE SUPPORT

Today, Peregrine is a leader in providing security engineering and federal cybersecurity compliance assessments, including FISMA, PCI DSS, and the National Institute of Security Standards (NIST) Risk Management Framework (RMF). Since August 2016, Peregrine has been the prime contractor to DoS for the Media Campaign Services contract (SAQMMA16D0102), successfully responding to six highly diverse task orders in support of DoS requirements for Mexico, Yemen, and Ukraine. They include: US Embassy Kyiv Messaging: Support for a Ukraine Anti-Disinformation Social Media Campaign; Mexico Media Radio Spots in support of the US Embassy in Mexico City; American Citizen Services Call Center for all Mission Mexico; DOS Strategic Media Campaign: Commercially branded, interactive, moderated online messaging platform campaign targeting the Islamic State; Subject Matter Expert (SME) Advisor – Security Sector Reform (SSR) & Disarmament, Demobilization, and Reintegration (DDR) for Yemen; and Multimedia campaign support to La Neta de TU Planeta (Reality of YOUR Planet) initiative in support of AgroBIO Mexico.

INDUSTRY INNOVATOR

Cybersecurity is a major business risk, and organizations need a comprehensive security strategy addressing this risk. Peregrine is a leader in cutting-edge research and technology in the cyber arena. We focus on using business drivers to guide cybersecurity activities and consider cybersecurity risks as part of the organization's risk management processes, thus potentially reducing and better managing cybersecurity risks. We align with the NIST RMF and with all applicable DoD Risk Management Framework controls. Our staff also directly supports research for the FY2017 NDAA Section 1650, Evaluation of Cyber Vulnerabilities of DoD Critical Infrastructure.

HIGHLIGHTED CONTRACTS

- **US Department of State** – Support for Media Campaign Services
- **Army National Guard** – Recruit Sustainment Program (RSP)
- **OASD E1&E** – Platform Resilience Mission Assurance; Unmanned Aerial Vehicle Study
- **DSCA** – Cyber Security and Enterprise Architecture
- **US Department of Transportation** – Surface Transportation Board IT Services
- **Smithsonian Institute** – Facilities Maintenance and Information Assurance

541611, 541612, 541618, 541990, B542, R406, R408, R409, R410, R431, R499, R699, R799, U008, U009

— Related Accomplishments —

Project and Program Management

U.S. Department of Energy (DOE), Strategic Petroleum Reserve. Provided management, training, and technical support services; developed and implemented the internship program; developed security plans; and provided administrative, IT, and HR support. Successfully transitioned all incumbent staff. Saved roughly \$450,000 in training costs during transition to a cloud-based IT solution. Overall evaluation score of 99.3% on 2015 Annual Evaluation.

“PEP was responsive to ever changing guidance, scenarios, and DOE requirements throughout the contract.” – DOE/SPR CPARS

Process Improvement

City of Long Beach, Pacific Gateway. Helped 1) develop and implement strategic objectives; improve internal processes to enhance service delivery; 3) provide professional development for staff; and 4) support policy compliance. Supported the Adult Services staff in designing an enhanced service delivery model and redefining the Career Specialist role, by developing/administering assessments, conducting focus groups, analyzing data, and developing recommendations.

Change Management

HHS, Office of Family Assistance (OFA), Health Profession Opportunity Grants (HPOG) Program Office. Increased grantee access to information and expertise through major changes to the HPOG website, including a password protected back-end for resource development, and the addition of a password-protected online community of practice (CoP). Worked with OFA to develop a strategic plan, developed workflows for new website capabilities, and designed/implemented CoP user engagement strategies.

Training and Development

HHS, National Institute for Occupational Safety and Health (NIOSH). Executed a vital emergency operations training program to better equip first responders in their use of Personal Protective Equipment. Implemented the Baldrige Quality model, secured a high level of buy-in by engaging stakeholders in the development of the products, and earned a perfect CPARS evaluation.

*“PEP was easy to work with and went overboard to ensure that the finished product met our needs.”
– NIOSH Final CPAR*

U.S. Air Force. Supported the creation of the Eaker Center Squadron Commander Development Course, creating 64 hours of instruction and graduating 61 students in less than five months. Won the 2019 Air Force Diversity and Inclusion Award and received an overall rating of 91% from course graduates.

“... a transformative leadership experience that highlights diversity and teaches skills to engage all stakeholders.” – Major General Mark E. Weatherington, AETC/CD

Project Design and Execution

U.S. Department of Labor, Division of Strategic Investments. Developed and efficiently implemented annual work and technical assistance (TA) plans for the Youth CareerConnect TA contract. Trainings and TA services improved grantee capacity. Cost savings allowed for a six-month no-cost extension.

Administrative Support

DOE, Office of Nuclear Energy. Reduced Correspondence Control Center (CCC) outstanding actions to an all-time low. Provided support in CCC, front office, human capital services, and communications services at NE and other DOE offices, including the Undersecretary of Science and Energy. Staff was recognized by NE Assistant Secretary for exceptional service. Earned perfect annual CPARS evaluations with “exceptional” scores in all five categories.

“[PEP] met or exceeded all delivery schedules and had a high degree of responsiveness to governmental requests.” – DOE/NE COR

GSA OASIS SB and 8(a) Company Overview

PM Consulting Group, LLC (PMCG), an SBA-certified 8(a) and Social Solutions International, Inc. (SSi), a woman-owned full-service consulting firm, provide a joint capability to support the global State Department mission with management, consulting, and a wide range of professional and technical services. With exceptional past performance over a combined 30 years of experience and SBA authorization for direct award, the PMCG/SSi team now adds a streamlined acquisition process and Best-In-Class status through GSA OASIS.

“PMCG continued its excellent track record in managing this award...with open communication, strong professionalism, and proactive, can-do customer service.”

EXCEPTIONAL SERVICE, **PRECISE** SOLUTIONS.

CAPABILITIES STATEMENT

FOR DEPARTMENT OF STATE

Precise Systems is a Service Disabled Veteran Owned Small Business currently supporting the U.S. Navy, U.S. Marine Corps, and U.S. Air Force. Our core capabilities include Program Management, Advanced Engineering, International Programs, Software Solutions, Model Based Systems Engineering, Information Technology, Training, Technical Services, Electronic Warfare, Security and Integrated Logistics. We were founded in 1990, and since our establishment, we have been providing cutting edge solutions and support to our warfighters. We understand and provide expert consultation on network and weapons systems acquisition programs, maintenance/modernization programs, and sustainment programs. For over 30 years, Precise Systems has demonstrated and perfected our ability to manage any task, no matter how difficult or complex.

Program Management	Advanced Engineering	Intl Program Support	Software Solutions	Information Technology
Training	Technical Services	Model Based Systems Engineering	Integrated Logistics	
Electronic Warfare	Security			

PROGRAM MANAGEMENT

Our program management team of professionals provide second-to-none technical, financial, contract, process, communications, and administrative subject matter experts to augment our customers with the right skill sets. We lead cross-functional teams to translate customer objectives into actionable tasks. We fill the gaps and work together to find optimal, long term solutions by:

- Balancing customer demands & recommending trade-offs
- Allocating resources, managing budgets, & tracking progress
- Considering new technologies & anticipating the needs of the industry.

INTERNATIONAL PROGRAMS

Our International Program Support is staffed with a team of experts – located both domestically and abroad - that navigate our customers through every step of the Foreign Military Sales (FMS) and Cooperative Agreement process. With support for more than 35 nations, it is our business to understand the complexities that affect international security assistance and security cooperation efforts.

ADVANCED ENGINEERING

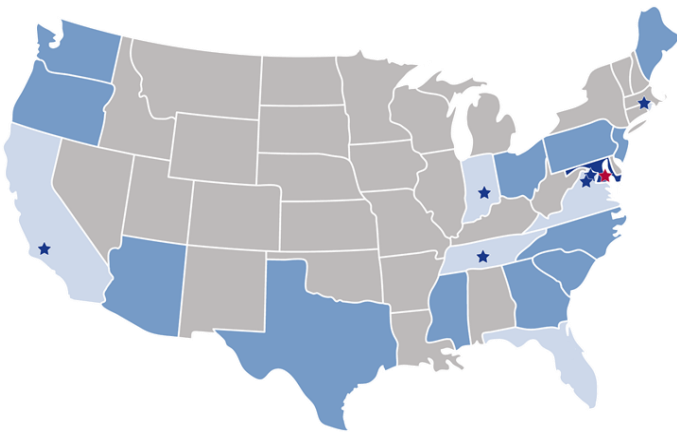

Engineering today's complex systems demands an in-depth knowledge of technology and its integration to create usable and sustainable designs. Precise Engineers are adept in the full spectrum of engineering disciplines including:

- Systems Engineering
- Model Based Systems Engineering
- CATIA Modeling
- CAMEO Modeling
- Simulation Engineering
- Digital Engineering
- Engineering Tool Development
- Weapons System Integration
- Research and Development
- Test & Evaluation

SOFTWARE SOLUTIONS

We provide full life cycle development, management, training, and sustainment of enterprise level web based software applications. Using the proven techniques of Agile software development, our processes are designed to determine customer requirements and to always provide the right solution. We specialize in modern JavaScript framework front-end web applications with Microsoft .NET core Rest APIs and SQL Server databases with Tableau B/I Tool integration.

RiverTech

About Us

Need an agile, trusted company that offers robust capabilities? Look to RiverTech to support the federal government's critical requirements via OASIS. As a wholly owned subsidiary of Akima, an Alaska Native Corporation and an SBA 8(a) that is eligible for Sole Source, RiverTech has deep mission understanding, top CPARs, and welcomes the opportunity to support your upcoming mission requirements. Together with its sister companies, RiverTech has offices located across the United States and around the world and can swiftly execute orders of both small and large magnitude. Our team stands ready to support your immediate needs.

Our Capabilities

Facilities, Maintenance & Repair

Comprehensive services for equipment and vehicle maintenance, as well as building support services and management.

- Base Operations
- Civil Engineering
- Facilities Operations & Maintenance
- Range Operations
- Real Property Management
- Utilities & Infrastructure Support

Information Technology

Full spectrum IT product and support services.

- Data Analytics
- Advanced Analytics / AI & Machine Learning
- Cybersecurity
- Engineering & Development
- Enterprise IT
- IT Products
- IT Services Management
- Technology Solutions

Logistics & Supply Chain

From the warehouse to the airfield, our expert logisticians deliver support services designed to optimize and maintain all the links in our customers' supply chains.

- Aerospace Support Services
- Contractor Logistics Support
- Depot Level Maintenance, Repair & Refit
- Global Logistics Support
- Maintenance, Transportation & Supply Chain Management

Protective Services

Akima provides enhanced security, a proven quality-focused project management approach, and technology platforms that streamline detention operations, reduce programmatic and operational risks, and strengthen our nation's security.

- Access Control
- Armed and Unarmed Guards
- Base Security
- Detention Management/Secure Transportation
- Emergency Response
- Vulnerability Assessments

Systems Engineering

From pre-systems acquisition analysis and development to engineering, deployment, and sustainment—our experts support customers through the complete systems lifecycle.

- C5ISR
- Equipment Maintenance
- Research & Development Support
- Wired & Satellite Telecomm Service

Mission Support

Comprehensive professional services to support federal agency missions. Our expert teams are rapidly deployable, always reliable, and offer innovative solutions to help you transform your operations.

- Curriculum Development, Platform Instruction, Exercise Training
- Intelligence Analytics
- Office Administration
- Records Management
- Research & Development
- Staff Augmentation
- Subject Matter Expertise

Furniture, Fixtures, & Equipment

A single point of contact and accountability to handle facility outfitting—from planning and artwork to medical devices and IT.

- Health Facility Outfitting
- Initial Outfitting & Transition Services
- Planning & Management Services
- Products

Construction

Specializing in design/build projects of all sizes.

- General Contracting & Renovation
- Civil & Marine Construction
- Transportation Systems

AWARDS

RM ADVISORY SERVICES LLC

FINANCIAL MANAGEMENT • AUDIT • GOVERNMENT SOLUTIONS

RM Advisory Services LLC (RMAS) is a licensed CPA firm providing audit, financial management, accounting operations, audit readiness and advisory services to Federal government.

RMAS has provided financial management services to the State Department since 2010. This includes support on property accounting for the State Department OCFO, audit support to the *Office of Inspector General*, and tax reimbursement professional services to I/O/MPR since 2016. Our support to IO/MPR earned a State Department *Distinguished Achievement* award for redesigning and implementing new FM processes.

RMAS is a distinctive solutions-driven firm bringing expertise in transformation, reliability, accuracy and sustainability to Federal financial operations. Many of our professionals worked previously for Big Four audit firms and have advanced degrees in business, government management and auditing (CPA, MBA, CDFM, CGFM, CISA). RMAS has undergone the AICPA peer review program to perform GAGAS Yellow Book audits, and received a PASS rating with no deficiencies.

PROVEN AND DIVERSE CAPABILITIES

The SierTeK-Peerless Joint Venture (JV) LLC (SPJV) combines the experience and expertise of two top defense companies into one exceptional organization providing technology-focused consulting and research to government clients. We support the DoD, NASA, Department of Energy (DoE), and the EPA and other federal agencies. We have disaster recovery capabilities and relevant experience as presented below. Our organization has almost 700 employees at operating locations nationwide.

PROGRAM MGT/DISASTER-RELATED SUPPORT

- Program and Project Management
- Integrated Master Scheduling
- Financial Management
- Marketing, Public Affairs, Outreach
- Environmental Consulting (ISO 14001 certified)
- Remediation Consulting (DOE experience)
- Contracting/Procurement

SYSTEMS ENGINEERING

- Model-Based Systems Engineering
- Architectural Design
- Electro-Optical/Infrared Engineering
- Technology Research and Transfer
- Electronic Warfare and Nuclear Engineering
- Safety Engineering
- Supportability Engineering
- Modeling and Simulation
- Risk Management

INTELLIGENCE, SURVEILLANCE, RECONNAISSANCE

- Nuclear Command and Control Studies
- Planning and Architecture Development
- Spectral and Thermal Processing, Exploitation, Dissemination, and Production
- Battlespace Characterization / Situational Awareness
- Enhanced Video Datalink Coordination

INFORMATION TECHNOLOGY

- Systems Requirements and Design
- Agile Software Development
- Service-Oriented Architecture (SOA)
- Enterprise IT and Capital Investment
- Database, Systems and Network Administration
- Help Desk and Call Center Support

FEATURES

- Top Secret Facility Clearance
- ISO 9001:2015 Certified
- ISO 14001 (Environmental Management) Certified
- CMMI Level 3 Appraised
- DCAA-approved accounting, finance timekeeping & procurement systems

RESEARCH & DEVELOPMENT, TEST & EVALUATION

- Technology Exploitation
- Systems Requirements and Design
- Aerospace Medical
- Live, Virtual and Constructive Environments
- Developmental and Operational T&E
- Test Documentation

AEROSPACE

- Space System Engineering Analysis, Design
- Independent Program Assessment
- Space Propulsion Technologies

We are a global leader in forensics, biometrics, mass fatality response planning, laboratory accreditation, and identity intelligence.

For nearly 20 years, SNA has provided high-quality services to scientific missions across the federal government, including DOJ, DoD, DoS, and DHS. We are a world leader in forensics, biometrics, mass fatality response planning, laboratory accreditation, and identity intelligence services. With a staff of forensic scientists, emergency planners, medicolegal, IT, and business professionals, we support highly visible forensic human identification operations, including some of the most extensive federal forensic operations by the United States.

Our work with U.S. Department of State (Iraq)

Our comprehensive training program focused on creating engaging training for adult learners. We ensured trainers always use the best training methods, procedures, and technologies to offer the most effective training. The Department of State chose SNA to enhance university scientists' and academic forensic technical capacity to identify human remains from mass fatalities in Iraq.

In less than 60 days and within budget, SNA developed curriculum and training materials and facilitated training, meetings, competency testing, and program development. Additionally, an independent assessment team evaluated the program and found that the program successfully established a qualified core cadre of university scientists capable of providing education and training to the university community and other stakeholders.

The program also provided the following improvements:

- Enhanced Iraqi university scientists' technical capacity to identify human remains from mass fatalities by 243%, which was over three times more than the initial success indicator.
- The trainees achieved or exceeded several key milestones, and the program trained 344 individuals, an increase of 115% over the original success indicator
- Enhanced institutional capacity was reported as a result of the educational materials created by SNA, and widely used throughout the life of the program.

Ranked #150 on Inc. 500, and 9th Fastest-Growing Government Contractor
Washington Business Journal's #4 Fastest Growing Company in 2020

OASIS and Pool 4

OASIS is GSA's next-generation multiple award, Indefinite Delivery Indefinite Quantity Best in Class (BIC) contract to provide government agencies with contractual solutions to complex professional services missions. OASIS allows government-wide procurement across a wide range of services/service requirements while offering flexibility of multiple contract types and pricing at the task order level. Pool 4 is specifically focused on Scientific Services supporting Research and Development in Biotechnology and the Physical, Engineering, and Life Sciences. Services are awarded under seven North American Industry Classification System (NAICS) pools.

SNA is a prime contractor on the OASIS SB Pool 4 contract covering NAICS codes 541713, 541714, and 541715.

Our work with the U.S. Defense POW/MIA Accounting Agency (DPAA) & Armed Forces Medical Examiner System (AFMES)

Currently, the prime contractor for both DPAA and AFMES, SNA provides a total of 250+ forensic scientists in support of the world's most complicated human identification effort: the recovery and identification of U.S. Service Members from current and past conflicts, such as World War II and the Korean, Vietnam, Cold, and Gulf Wars.

Our teams include recovery experts, anthropologists, archaeologists, case coordinators, odontologists, historians, and administrative support personnel, who provide comprehensive forensic investigative services. We manage 950+ pieces of equipment, conduct evaluations, validations, provide quality assurance, chain of custody, evidence control, management, and tracking for 8,260,384 blood identification cards for the nation's warfighters.

U.S. Department of Justice

Provided advisory services resulting in recommendations for enhanced biometric deconfliction & data management.

U.S. Department of Homeland Security

Implement DNA as a biometric to reduce immigration fraud, detect U.S. adversaries before entering our country, & reunite families following disasters.

U.S. Army Past Conflicts Repatriations Branch

Developed detailed processes, procedures, & case tracking tools, exceeding client case processing requirements by 21%.

Physicians for Human Rights, Libya

Delivered realistic assessment of the requirements to identify commingled remains from Gaddafi's reign and the recent revolution.

Our work with the American Association of Crime Laboratory Directors (ASCLD)

In September 2017, Hurricane Maria, a deadly Category 5 hurricane, devastated Saint Croix, Puerto Rico, and the Commonwealth of Dominica. The storm is regarded as the worst natural disaster in recorded history for the three islands, with an estimated 2,975 people killed in Puerto Rico alone. Following Hurricane Maria, SNA supported identification efforts by providing mass fatality response and human identification during an ASCLD-led initiative to help the Puerto Rico Forensic Science Laboratory and Medical Examiner's Office.

Our experts assessed identification operations, including body storage, identification, record management, and reporting. Our team identified several gaps, provided solutions, assisted with the DNA identification efforts, and provided protocols and procedures for enhanced identification operations. Additionally, our forensic and medicolegal SMEs supported ASCLD in designing and facilitating an interactive, hands-on workshop for 50 forensic laboratory directors from over 20 jurisdictions, focused on disaster victim identification, including FAC/VIC and incident morgue operations.

Spiral Solutions and Technologies, Inc.

MISSION

To rapidly produce cost effective, modern, and secure capabilities
that exceed our customer's expectations

Capabilities

- **Software Development and Systems Engineering**
DevSecOps software developers and engineers utilize Lean Kanban Software Development Life Cycle (SDLC) methodologies
- **Database Management Systems Development and Support**
Creates, manages, and sustains worldwide Enterprise and custom databases for the Department of Defense
- **Legacy Software and Systems Modernization**
Longstanding experience with transitioning legacy software, systems, and databases to modern, robust, and capable products
- **Experience with Geographically Separated Customers**
Supports worldwide customers with both help desk and onsite
- **Accelerated Processing, Exploitation, and Dissemination (PED)**
Data Flow Analysts, Engineers, and Scientists streamline and accelerate data transport by providing secure, integrated, highly automated Big Data management in multi-network environments

Differentiators

- Cutting edge remote DevSecOps software application development for integration into any domain
- DoD Platform One compliant/DevSecOps software model and Technology stack
- Highly-experienced with Open-Source Software and technologies enabling efficient, cost-effective, and modern solutions

SSAI Science Systems and Applications, Inc.

Capability Statement:
U.S. Department of State

Science and Technology with Passion

www.ssaihq.com

WHO WE ARE

SSAI's responsive management team is underpinned by efficient and effective business and mission assurance processes, documented in our Quality Management System (QMS) registered under ISO-9001:2015 and appraised at CMMI Maturity Level 2. We have a 46-year record of successful performance on more than 175 contracts awarded by U.S. federal agencies, science institutes, and universities. Our core support service areas are: scientific R&D, instrument engineering, science data center operations and maintenance, systems engineering, and information analytics. SSAI has participated in 160+ NASA space and Earth science missions, and we have received numerous honors that validate our record of outstanding performance.

OUR EXPERTISE

SCIENCE, ENGINEERING, AND INFORMATION ANALYTICS

Data Ingest and Distribution

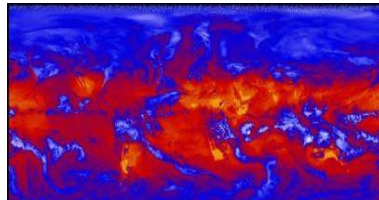

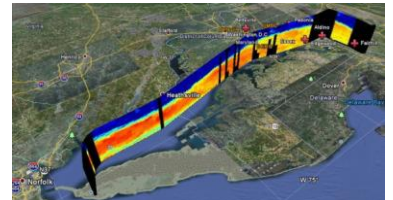

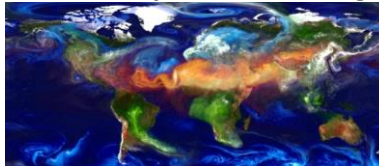

Image depicting longwave energy being radiated to space. SSAI distributes data products that allow scientists to better understand Earth's atmosphere.

Remote Sensor Data Collection

Wildfire smoke profile over the Chesapeake Bay. SSAI and NASA collected data using the HSRL remote sensor on NASA's US-12 research aircraft.

Data Analysis and Modeling

Global Aerosol Modeling and Visualization Performed on NASA's Center for Climate Simulation (NCCS) Supercomputer.

Instrument Development and Calibration

SSAI builds, tests, integrates, and calibrates research instruments, such as the Cloud-Aerosol Transport System (CATS), which flew aboard the International Space Station.

At a Glance

STi is an Engineering Company obsessed with creating world-class MRO, Engineering & Cutting-edge Logistics services.

Corporate Experience

Contract Field Teams (CFT) Support: STi is one of 10 small businesses awarded this \$11 billion contract. STi provides a rapid-deployment workforce to complete Organizational, Intermediate/ Field, and Depot/Sustainment level maintenance for aircraft, ground and other active systems for the Air Force, Navy, Marine Corps, Army, and Coast Guard.

Integrated Logistics and Distribution Support: STi provides project management, logistics, warehousing, Heavy Mobile Equipment, and Systems analysis support for the Marine Force Storage Center. STi provides services to the overall Reset/Retrograde effort supporting of the warfighter.

Federal Aviation Administration Services: STi currently provides aviation maintenance services to Federal Aviation Administration Flight Program Operations at multiple locations. We provide program management support, electronic technical support, A&P Technical support, and laborer support on and for FAA supported aircraft.

NUWC Keyport - Technical and Industrial Support Services: STi oversees logistics, testing, training, and measurement facilities equipment, range system operations and maintenance processes, and system evaluation activities. STi provides design, fabrication and T&E of systems for USW warfare environment simulation and performance measurement with acoustic testing against weapon specification to support full-spectrum acquisition, at-sea trial, and experimentation requirements.

Space Force: STi provides aircrew services to perform Functional Check Flights (FCFs), maintenance flight tests, Operational Check Flights (OCFs), and Acceptance Test Profiles (ATPs) (as well as recoveries and pickups) to determine airworthiness and maintenance status of various aircraft in support of the PR Helicopter Rescue Squadron (RQS).

Air Education and Training Command (AETC): STi provides Advisory and Assistance Services (A&AS) to AETC/A3G for project management, support and sustainment, conducts analysis of functional requirements, change management, current software/IT environments, cybersecurity, architecture and design for myLearning.

Intelligence Operations (TRAC-FLVN): STi provides military intelligence (MI) context through scenario intelligence operations development, documentation, and refinement support of new and existing AFC Standard Scenarios.

Commander, Naval Air Force Reserve (CNAFR): STi provides NALCOMIS virtual system management, operations, systems administration, systems maintenance, security, systems training and overall technical expertise required to operate and maintain NALCOMIS at multiple locations.

Contract Vehicles

- **SeaPort-NxG Prime Contract:** N00178-19-D-8586 (Previous Prime - Seaport-e)
- **Contract Field Teams (CFT) Prime Contract:** FA8108-17-D-0006
- **Enhanced Army Global Logistics Enterprise (EAGLE):** W52P1J-19-G-0036
- **GSA Professional Support Services Schedule (PSS):** GS-00F-164CA
- **OASIS SB Pool 1 Prime Contract:** 47QRAD-20-D-1007
- **OASIS SB Pool 3 Prime Contract:** 47QRAD-20-D-3022
- **ASTRO Prime Ground Contract:** 47QFCA-22-D-0173
- **ASTRO Prime Aviation Contract:** 47QFCA-22-D-0142
- **KRACEn Prime Contract:** N68520-20-D-0027

Differentiators

- **Market Responsiveness:** STi responds to customer demands quickly and efficiently
- **Technological Advantage:** We offer advanced technical knowledge and understanding, applying cutting-edge technology
- **People & Culture:** We inspire our employees to innovate and solve complex problems, creating a culture of excellence

Strativia delivers technical and professional services to both government (federal, state & local) and commercial organizations worldwide. Our core services include: Web & Application Development, Big Data & Analytics, Cloud & Infrastructure, Cybersecurity, Program & Administrative Management, Management Consulting, Logistics & Materials Handling, Operations & Maintenance and Staff Support.

Why Strativia?

As a valued client, your agency has access to on-demand talent when and where you need it. We work with your organization in a spirit of collaboration and true partnership by understanding your needs and delivering real results. In short, you gain access to a value-added strategic partner with best-in-class capabilities and competent professionals with relevant domain insight.

What Makes Us Different?

Strategic Focus

Delivering technology, business operational strategies and other solutions to government and commercial clients nationwide.

Dedicated People

Our people work tirelessly toward a positive transformative impact on your organization.

Relevant Competencies

Equipped with appropriate knowledge and credentials, we are able to better meet client needs across each engagement.

Domain Expertise

Emphasizing technology and business processes, we are able to better leverage our experience in the verticals we serve.

What We Do

Technology

- IT Planning & Strategy
- Website, Portal & Application
- Design & Development

Native American and
Woman-Owned Small Business

Sundance-EA Partners II, LLC (Sundance-EA), is an established environmental consulting and compliance firm specialized in natural and cultural resources, engineering, and remediation services. Sundance-EA offers more than 600 in-house resources in 30 nationwide offices, who have executed work for the Department of Defense and Civilian Agencies across the United States, including Alaska, Guam, and Hawaii.

Site Characterization and Remediation

- Phase I and II Site Assessments
- CERCLA and RCRA Compliance, Investigations, Remediation, and Documentation
- Emerging Contaminants Investigation and Remediation
- Site Characterization and Investigation for Soil, Soil Vapor, Groundwater, and Sediment
- Environmental Records Auditing and Archival Research
- Remedial Investigations (RIs)/ Feasibility Studies (FSs) for HTRW and Munitions Projects
- Land and Water-based Geophysical Investigations
- Contaminated Sediment/Dredging Studies, and Remediation
- Air, Water, and Waste Permitting and Monitoring
- Toxicology and Risk Management
- Regulatory Compliance

Natural and Cultural Resource Services

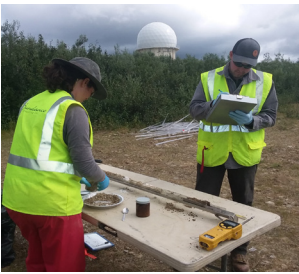

- NEPA Analyses/Documentation
- Natural Resource Evaluations
- Forestry and Range Analysis and Management
- Wetlands Delineation, Mitigation, and Restoration
- Environmental Assessments
- Cultural Resources and Archaeological Inventories and Investigations
- Ecological Risk Assessments and Inventories

Additional Capabilities

- Environmental Awareness Training
- Data Mapping Services and GIS Geodatabase Capabilities
- Coordination and Communication with Contractors, Federal Clients, and Stakeholder Agencies
- Construction Phase Services
- Public Involvement, Facilitation, and Consensus Building
- Tribal Liaison Services
- Outreach to Stakeholders, Agencies, and Interested Parties
- Geographic Information Systems and Data Visualization

QUALIFIED AND EXPERIENCED

Supplemental RI, Murphy Dome Long Range Radar Station, Alaska

The Sundance-EA JV performed a supplemental RI to close the remaining data gaps for completion of a CERCLA Supplemental RI report, FS, proposed plan, and record of decision for Waste Accumulations Area No. 2 and the Bulk Fuel Storage Area. Contaminants of concern included volatile organic compounds, gasoline and diesel range organics, and residual oil range organics; polycyclic aromatic hydrocarbons; naphthalene; ethylene dibromide; organochlorine pesticides; total organic carbon; and lead.

Bulk Fuels Facility Remediation Services, Kirtland Air Force Base (AFB), New Mexico

Since 2016, Sundance and EA have jointly supported environmental restoration efforts at the Bulk Fuels Facility under the requirements of RCRA, as administered by the New Mexico Environment Department. Services have included vadose zone soil vapor monitoring of 284 points with analysis for US Environmental Protection Agency Method TO-15 and field parameters, including hydrocarbons, oxygen, and carbon dioxide; preparation of a RCRA Facility Investigation (RFI) report and risk assessment; community relations support; monthly sampling, analysis, and reporting for drinking water; and development of a land use controls implementation plan. The RFI report objectives were to characterize the nature and extent of fuel-related contamination in the vadose zone (soil and soil vapor), light non-aqueous phase liquid, and groundwater, and to provide adequate characterization to evaluate and select the applicable corrective measures.

Resource Management throughout the NAVFAC Pacific Area of Responsibility, Hawaii and Guam

The Sundance-EA JV holds a 5-year IDIQ contract with the US Navy for natural resource management through the NAVFAC Pacific Area of Responsibility. More than 20 task orders have been awarded to date. Projects that exemplify the JV's expertise and capabilities include: Construction of an Ungulate (deer and pig) Fence at Naval Base Guam Munitions Site; and Threatened and Endangered Species Surveys, Non-native and Invasive Species Identification and Eradication, and Identification of Host Plants of the Mariana Eight-spot Butterfly at Naval Base Guam and Northwest Field in the Live Fire Training Range Complex at Andersen AFB.

Sheeting/Shoring and Soil Excavation at Building 235, Joint Base Meyer-Henderson Hall, Virginia

Sundance and EA jointly installed a sheeting/shoring system and performed petroleum-contaminated soil excavation at Building 235. Work included utility location via ground penetrating radar and potholing, storm water pollution prevention controls and monitoring, site characterization soil boring, and sampling and analysis to define the extent of contamination. Ongoing site activities required hydrocarbon emissions air monitoring, including benzene. The team also conducted confirmation sampling to Virginia's Voluntary Remediation Program Tier III screening concentrations.

F-35A Beddown Program Soil Management for Construction Activities, Eielson AFB, Alaska

Working on an accelerated timeframe, the Sundance-EA JV prepared and facilitated a charrette that involved state and federal regulatory agencies, USACE, the US Air Force, and Base Civil Engineering personnel, as well as construction contractors to develop a programmatic Uniform Federal Policy for Quality Assurance Project Plans work plan. The F-35A Beddown Program hit a potentially program-killing complication when PFAS contamination was found throughout the proposed construction area. Sundance-EA facilitated negotiated agreements with the regulatory agencies to establish a path forward for PFAS-contaminated soils that enabled construction to proceed with minimal cost or schedule impact to the mission-critical objective. Based on the JV's performance, the team was tasked with planning and facilitating a series of charrettes to address construction dewatering operations for PFAS, petroleum, and chlorinated solvent-contaminated soils and groundwater from the shallow, high-hydraulic conductivity aquifer underlying the areas impacted by construction and excavation activities.

Boise Storage Feasibility Study and Environmental Impact Statement (EIS), Boise, Idaho

The Sundance-EA JV developed an integrated Feasibility Report and EIS to analyze a proposed structural dam raise. To meet funding obligations under the Water Infrastructure Improvements for the Nation Act, the Feasibility Report and EIS were completed concurrently. The EIS, the first within the Bureau of Reclamation to be completed in compliance with Executive Order 13807, used the One Federal Decision method, with the US Forest Service and USACE as official Cooperating Agencies. Twenty-two specialist reports support the analysis in the EIS. The team also prepared a Biological Assessment and provided Endangered Species Act consultation to receive an Incidental Take Statement for the effects of the dam raise and operation and maintenance activities on federally protected bull trout and their critical habitat.

TeraSense is an IT Modernization firm

Our solutions modernize critical mission applications and systems.

TeraSense is comprised of domain subject matter experts committed to providing advanced solutions which elevate our customers in achieving their mission. Our professionals leverage industry best practices to design, develop, integrate, and deploy complex systems and software solutions for our mission partners.

CUSTOMER CENTRIC MISSION SOLUTIONS

Technical Capabilities

Agile DevSecOps

TeraSense agile processes lead to rapid delivery, adapt to changing requirements, and achieve faster time to deployment while decreasing programmatic risk.

Cloud Solutions

Our team builds cloud solutions that integrate the right platforms, technologies, and cloud services to optimize infrastructure security, scalability, and availability.

Cybersecurity

TeraSense engineers build end-to-end security solutions to advance our national security and protect our domestic infrastructure.

Systems Engineering

TeraSense systems engineers are committed to the design, development, testing, and deployment of fully operational systems to ensure systems readiness.

Professional Services

TeraSense professionals support our federal partners with programmatic oversight, management consulting, and information technology support.

About Us

TeraSense was founded with a vision to advance customer capability through the design, development, integration, and deployment of mission critical systems and software solutions.

Through focused customer engagement and awareness of an evolving technology landscape, TeraSense has evolved into an IT Modernization firm. Our professionals leverage industry best practices and emerging technologies to create trusted digital solutions. Our team is successful in supporting our customers in meeting their objectives which are aimed to:

- Advance National Security
- Secure Domestic Infrastructure
- Optimize Mission Capability
- Enhance Civic Engagement

Mission Driven IT Modernization STEM Technical Development

Cloud Engineering DevSecOps

TeraSense supports TRADOC G6 with Agile DevSecOps. Our team builds flexible, scalable, and secure software solutions with consistent, deterministic provisioning, and configuration management. Processes and standard operating procedures are captured as code which is placed under version and change control. The resulting infrastructure-as-code provides operational agility by automating processes.

The deterministic nature of a fully automated DevSecOps solution also lends itself to consistent, fine-grained security controls. Tenets of the zero trust framework like micro segmentation can be leveraged with little to no operational overhead. Because controls and their associated policies are captured as code, they can be continuously audited and verified via automated scripts.

Enterprise Defensive Cyber Operations

TeraSense is working with CrowdStrike to build and deliver a Managed Threat Hunting and automated CND/DCO Maneuver Service for DoD Enterprise Defensive Cyber Operations. The focus of this effort is to shift from computer network defense to actual DCO Maneuver with adversary identification and breach prevention. TeraSense is partnering and integrating managed security services with CrowdStrike's Falcon Platform to automate key DCO functions across endpoint, cloud, mobile, and network perimeters.

The advantage of our approach is a unified and lightweight delivery model via SaaS paired with high-value TeraSense DCO operators and threat analysts to provide immediate time-to-value, better performance, reduced cost and complexity, and advanced protection beyond traditional signature based cybersecurity to stop breaches.

TeraSense Jumpstart

TeraSense's Jumpstart Program provides STEM students access to cutting-edge Cybersecurity, Systems Engineering, and Software Engineering projects. TeraSense leadership takes an active position in Baltimore City community outreach, specifically targeting minority institutions (Bowie State, PG County, UMD-CP, UMBC) to recruit and cultivate the next generation of STEM talent.

Our goal is to strengthen the networks, relationships, and resources that connect academia, industry, and government agencies to facilitate the development of the next generation of STEM talent. Through this approach, our team is able to facilitate the exchange of scientific ideas, impart technical knowledge, and carry out an impactful outreach program to cultivate curiosity and technical talent.

CAPABILITIES STATEMENT FOR THE U.S. DEPARTMENT OF STATE

OVERVIEW

TFC Consulting Inc. (TFC) is a trusted solutions-driven consulting firm. We provide comprehensive solutions to improve the State Department's financial operations.

Our customers benefit from TFC's expertise:

- Innovation and creativity to drive process transformation and increase operational efficiency
- Acute knowledge of federal financial and risk management
- Proven technical methodologies
- Customized management approach
- Experienced and credentialed personnel (CPA, CGFM, CISA, CFE, CIA, PMP, UiPath RPA Developers)

We have built a reputation among our federal clients for delivering desired outcomes with a focus on the specific needs and goals of the customer. Since its founding in 2002, TFC has successfully served over 35 federal civilian and defense agencies, including the State Department.

MANAGEMENT CONSULTING SERVICES

Founded in 2009, The Prospective Group (TPG) is an economically disadvantaged woman owned business (EDWOSB) and minority owned small business providing information technology (IT) and management consulting services. TPG is distinguished by its seamless ability to work collaboratively across organizations using highly adaptive Agile methods, putting customer interests first and ensuring substantial and lasting improvements to processes and the mission. We have a track record of achieving high levels of customer satisfaction resulting in multiple engagements with many clients in a global setting. We meet or exceed requirements and expectations at the management, stakeholder and end user perspectives. We approach our engagements as shared endeavors with rapid progress toward tangible interim goals and products that are continually refined over time.

OUR SERVICES

- **Business Process Re-engineering (BPR)** – Conduct BPR, leveraging dashboards and analytics, to improve performance metrics and mitigate risk. Focusing on automated data analysis and predictive intelligence.
- **Acquisition Plans and Strategies** – Develop IGCE, SOWs, Feasibility Studies, Cost Benefit Analysis, and Determination of Findings for successful contract awards.
- **IT Strategic, Tactical, and Investment Planning** – Conduct Federal Government Capital Planning and Investment Control (CPIC) Reporting, establish and facilitate IT capital governance structures for executive level bodies.
- **Project Life Cycle Management** - Includes Agile-based methodologies and SDLC processes, requirements management, product design and security reviews, and quality checks to deliver quality end products that meet or exceed customer needs.
- **IT Security and Risk Management** – Provide support for all phases of the Assessment and Authorization life cycle process in compliance with NIST Risk Management Framework (RMF), Federal Risk and Authorization Management Program (FedRAMP) and Federal Information Security Management Act (FISMA).
- **Government-wide Mandates** – Assist clients with addressing mandates such as, Cloud Smart, Open Government, Homeland Security Presidential Directive (HSPD) 12, Green Initiatives, and Legacy Modernization Planning.
- **Foreign Policy Expertise and International Experience** - Optimize diplomacy and defense convergence to promote visionary national security policymaking, planning and implementation by reinforcing common goals between DoS, USAID, and DoD and promoting collaboration between diplomatic and military activities. TPG has extensive experience with deploying skilled personnel overseas in support of U.S. foreign affairs agency initiatives.
- **Scientific Research** - Support research and analysis for human development, improving reproductive health, enhancing the lives of children and adolescents, and optimizing abilities for all.

OUR CLIENTS

- **Department of State** – OCIO/CISO, International Narcotics and Law Enforcement, Political and Military Affairs, Information Resource Management, Foreign Service Institute, Consular Affairs, Diplomatic Security, Management, Administration, Intelligence and Research
- **NIH** – National Institute of Child Health and Human Development: Population Health Research
- **OMB/OPM** – Performance Accountability Council Program Management Office: Security and Credentialing, Trusted Workforce
- **Defense Counterintelligence and Security Agency** – Acquisition and Contract Support Services, IT Strategic and Capital Planning

“Professionally run; professionally staffed. Excellent project partner.”

Operating Areas

UnityTec has been supporting projects on a global-scale for the last 7 years giving us the infrastructure and logistics capabilities to support OCONUS projects in multiple regions

Existing Department of State experience

UnityTec possesses recent and relevant experience for program management, logistics planning and support, administrative, and IT services performed at 27 CONUS and OCONUS locations.

We currently support Department of State's AFRICAP vehicle for training and advisory services, equipment procurement, logistical support, maritime security, capacity building, operational deployment for peacekeeping troops, aerial surveillance, conference facilitation and construction services. These services serve international peace processes, training and equipping, security reform including maritime, counterterrorism, and supporting military judicial institutions. for African countries.

We also provide regional, sub-regional and country-specific area studies/language training for DoS Foreign Services Institute for today and tomorrow's diplomats. UnityTec plans courses, training methodologies and techniques, developing materials, providing feedback and analysis, and developing instructional technologies. These courses highlight the key historical, political, economic, and socio-cultural themes, American interests and policy issues, as well as how the US and USG policy are perceived.

UnityTec provides additional relevant solutions for the Army, Defense Logistics Agency, as well as commercial customers. This includes support for executive / program operations, analytics, and modernization initiatives for facilities or systems.

USmax is a Prime contractor delivering worldwide mission critical support to Department of State (DoS). For 10 years, we have provided Program, Project Management, IT O&M, Worldwide Logistics/SCM, and Technical Security Services for DoS facilities including Embassies, Consulates and Chanceries.

We are agile mission partners specializing in delivering projects with complex and constantly shifting scope that require full-life cycle accountability, for manpower and material logistics. We deploy cleared American technical and SME workforce, often operating in remote and austere environments, and ensure successful delivery and continuity for planned and unplanned projects.

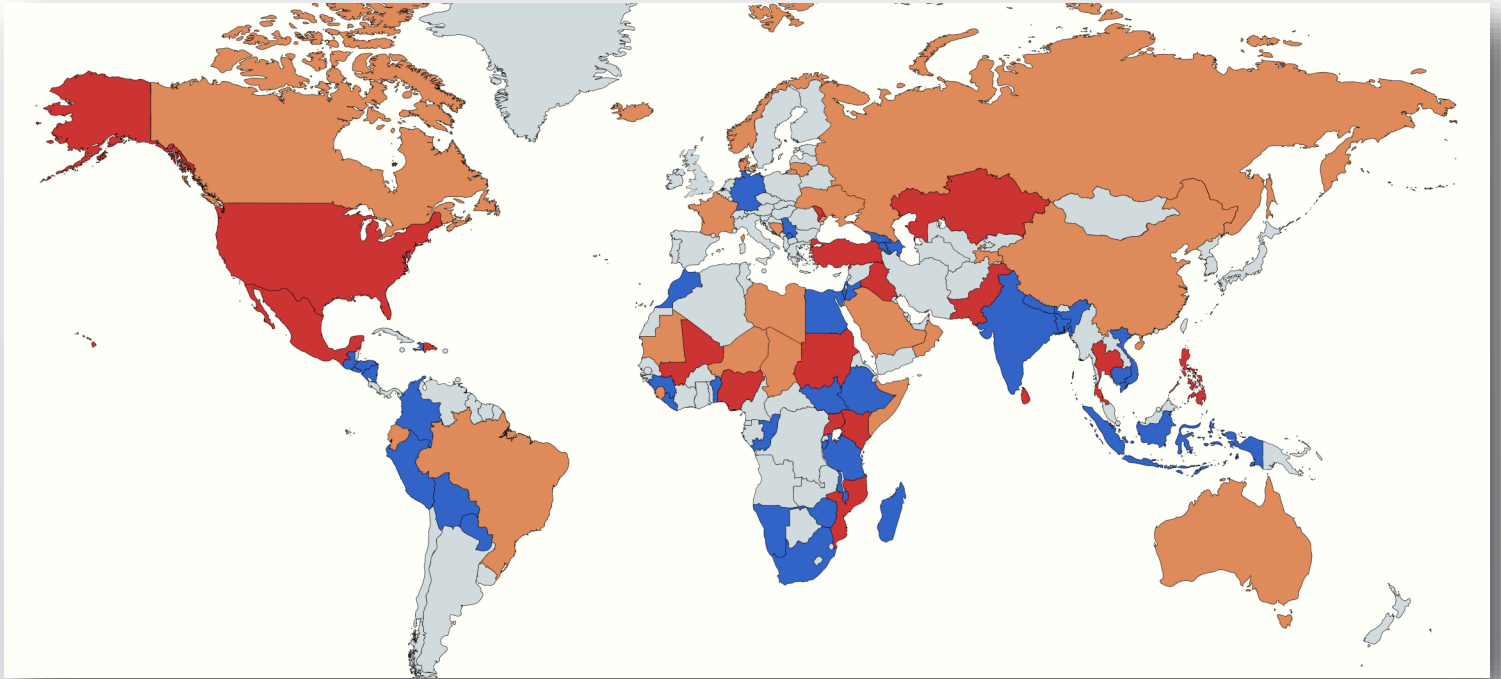

Our employees possess TS clearances, hold multiple relevant industry certifications, and bring experience in vast array of Diplomatic Security (DS) compliant systems and disciplines. Our expertise and experience in supporting security engineering, electrical, CAD engineering, technical security, design engineering, and project and program management reduces risk and generate value for our Customers. We apply our knowledge of local, domestic, and worldwide standards, requirements, and protocols to quickly and accurately deliver project requirements.

We are currently executing multiple concurrent global projects for Bureau of Overseas Building Operations, maintaining readiness for the changing requirements of tomorrow.

USmax, proudly offers and provides professional services through our **OASIS Small Business (SB) Contract**. As a **Pool 1 SB** provider, we provide multidisciplinary professional/integrated services governmentwide as a single solution for complex requirements.

Providing the technical and professional services globally that enable the Department of State and our other U.S. Mission Partners to securely execute their missions around the world.
